

Consider approval to purchase the Frontline Education school administration program subscription

1. Background:

Southwest ISD currently uses the Frontline Education school administration Enterprise Resource Planning (ERP) program from Frontline Technologies Group for student management, business operations, special education, and human capital processes. The District has purchased yearly subscriptions since Frontline Education ERP was adopted and implemented in September 2019.

2. Process:

The renewal subscriptions are procured through Buyboard contract 729-25 for Technology Equipment, Products, Services, and Software. Additional quotes were not obtained since Frontline Education already provides Southwest ISD with industry-leading solutions and technology, and substantial costs would be incurred transitioning to a different ERP.

3. Fiscal Impact:

The total cost is \$443,525 for renewal of the 12-month subscriptions. Locally budgeted funds will be utilized to purchase the subscriptions.

4. Recommendation:

The Board approves the purchase of the 12-month renewal subscriptions for the Frontline Education school administration program.

5. Required:

Board action.
