Once you have completed the online enrollment we will contact you to set up your Student Learning Plan (SLP) appointment.

If you have any questions, please feel free to call your local learning center at 866-864-5491.

Teacher Tip of the Month

by: Jen Whicker, KLC Contact Teacher

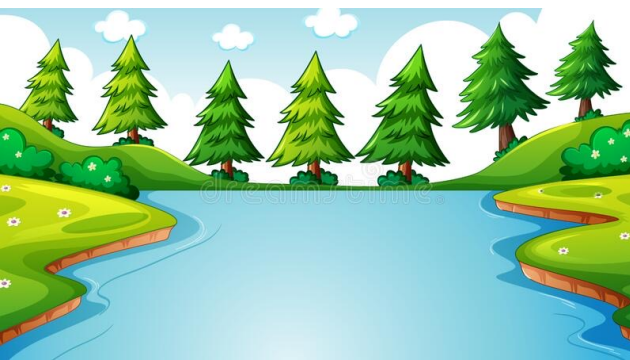

Spring in Alaska is usually in full swing in May and it's a great time to take some learning outside.

Here are some resources for meaningful and fun lessons.

[Discovery Southeast.org](http://DiscoverySoutheast.org), based in Juneau, has [Bi-Monthly Take-Home Nature Journals](#) that are free to download and a selection of instructional videos that are grade specific next to the description "Other Lessons and Activities".

[Alaska Seas and Watersheds](#) has free Alaskan standards-based lessons and units for grades K - 8

These online Alaska Seas and Watersheds teaching activities, developed by Alaska teachers, provide high-quality lesson plans and units for use by teachers and homeschoolers, as well as interpreters, youth groups, nature tour guides, and anyone seeking fascinating content on marine and associated watershed science topics. The lesson plans and units are complete and ready to use, aligned with Alaska state science standards, and include curricular connections to mathematics, English and Language Arts (ELA), art, and social studies; and teaching activities aligned with the Next Generation Science Standards and Alaska Math and ELA standards have been recently added.
