Additional Terms

Hardware installation will be conducted in a craftsman-like manner.

The following provisions will be adhered to by K12 Montana:

NORMAL CONSTRUCTION PROVISION

K12 Montana's standard expectation is that installation work may be performed during normal business hours, using normal and customary light-construction methods. This includes, but is not limited to, reasonable construction noises, drilling, mounting hardware to surface-mount locations, and other installation techniques required by the composition of the building.

If the Customer's building has limitations on when or how installation may occur—including, but not limited to, historic-building restrictions, limitations on noise, limitations on wall penetration, restricted work hours, or areas requiring special permissions—the Customer must disclose these limitations **prior to project scheduling**. Any such limitations disclosed after scheduling may result in delays or additional costs.

PREVIOUS DAMAGE PROVISION

K12 Montana will not repair pre-existing structural or mechanical issues. Door frame misalignments, broken or malfunctioning door hinges, and other physical door defects cannot and will not be repaired as part of this agreement.

NO HIGH-VOLTAGE WIRING

K12 Montana does not perform high-voltage electrical work. Any high-voltage electrical requirements must be completed by a licensed electrician engaged by the Customer.

HAZARDOUS ENVIRONMENT PROVISION

At K12 Montana's sole discretion, any environment may be deemed too hazardous for work due to safety risks, environmental hazards, or risk of loss of life or limb. If an environment is deemed hazardous, K12 Montana may decline to perform work in that area. The Customer must, at their own expense, engage a third party either (A) to perform the work in the hazardous environment, or (B) to remediate the hazardous conditions to K12 Montana's satisfaction before work may continue.
