1.0 Executive Summary

Dear Barry Broome,

As requested, we are submitting this proposal to provide the North Slope Borough School District with the Evolv Solution, including four years of service subscription.

ICU Technologies Inc. was formed by security industry experts that have a common passion for excellence. Our experienced staff has diverse backgrounds within IT, Security Consulting and Design, State, Local, Federal, K-12 and Higher Ed Government Security Sales and Installation. We pride ourselves in doing business with integrity and keeping our customer's best interest in mind first and foremost. Our detailed process is centered around producing measurable and referenceable business outcomes for all parties involved. ICU is heavily invested in its people, processes, and partnerships. We would like to personally thank you for taking the time to consider a partnership with our company. We look forward to the opportunity to earn your business!

Sincerely,

Jason Eatmon
Chief Experience Officer
ICU Technologies, Inc.

2.0 Evolv Express

Evolv Express, Concealed Weapons Detection (CWD), helps to proactively keep people and assets safe by using advanced sensors and artificial intelligence to detect a wide range of concealed weapons and threats. It is the world's first and only touchless security screening solution that is conducive to supporting post-pandemic security screening requirements. This solution operates up to ten times faster and far more effective than traditional screening methods, while providing a touchless experience.

2.1 Solution Technology

AI differentiates personal items from Threats.

Unlike traditional metal detectors, Evolv Express uses advanced sensor technology and artificial intelligence to screen guests while they walk through at a natural pace—without stopping and without handing over their belongings. Express offers a dual lane, free-flow system proven to operate up to ten times faster than traditional metal detectors, alerting operators to the presence of weapons while ignoring harmless personal items like cell phones, keys, and coins.

See potential threats for faster issue resolution.

When a potential threat is detected by the system, real-time image aided alarms show guards where the potential threat is located on a person or in his or her bag. This greatly reduces the amount of physical contact required and allows guards to act quickly and efficiently.

Prioritize the guest experience.

Families and groups can enter your venue together without long lines and without invasive checks. It's a welcoming experience that maintains dignity and accelerates entry for your guests and employees while keeping venues and facilities safe from threats.

Advance a proactive security posture.

With Evolv Insights®, the accompanying web-based and mobile-enabled analytics application, Evolv Express can account for its own performance, supporting post-event analysis and future operational planning. View visitor arrival curves and alarm rates by entrance, time, and date to understand where and when the flow of people—and threat objects—peak. Staff entrances accordingly for a proactive approach to security and operations.

2.2 Features

Concept of Operations/Site Survey: Evolv's approach to site surveys is thorough and customized, ensuring that each location is assessed precisely for optimal security deployment. Their team works closely with clients to develop a tailored concept of operations that aligns with specific site needs and objectives. This meticulous planning guarantees that security solutions are integrated seamlessly into the existing environment.

Go-Live: Evolv ensures a seamless transition to live operations through meticulous planning and execution, minimizing any potential disruption to normal activities. Their experienced team coordinates every aspect of the go-live process, ensuring that systems are fully operational and staff are prepared with an Evolv representative onsite for the first go-live day. This efficient implementation means clients can quickly benefit from enhanced security without unnecessary downtime.

Technology Updates: By providing regular wireless technology updates, Evolv ensures its systems remain at the forefront of innovation, offering clients a competitive edge. These updates are designed to enhance system capabilities and address emerging threats, ensuring optimal performance at all times. Clients can rely on Evolv to keep their security technology current and effective.

Community Messaging: Evolv excels in community messaging by providing the client with communication documents that keep all stakeholders informed including parents, board members, community members and your staff. They understand the importance of your desire to inform your stakeholders, ensuring that messaging is consistent and accessible to the entire community.

Warranty: While the Express has an active software license, Evolv offers a comprehensive four-year warranty that underscores its commitment to reliability and customer satisfaction. The warranty coverage provides peace of mind, assuring clients that issues will be addressed promptly and efficiently.

Support and Service: The support and service is characterized by exceptional responsiveness and industry expertise. This ensures clients receive the assistance they need onsite with their Evolv systems when they need it. The dedicated support team is equipped to handle a wide range of inquiries and issues, providing solutions with efficiency and professionalism. Support and service is provided with the 4-year term and renews in tandem with the 4-year software and services renewal.

24/7 Remote Support: 24/7 remote support offers unparalleled availability, ensuring that clients receive immediate assistance whenever required. This continuous access to support means that any issues can be quickly addressed, minimizing downtime and maintaining security integrity. Clients benefit from the peace of mind that comes with knowing help is always just a call away. 24/7 Support is provided with the 4-year term and renews in tandem with the 4-year software and services renewal.

Training Portal and Onsite Training: Evolv provides robust training options through their comprehensive training portal and onsite training sessions prior to their Go Live event, ensuring users are proficient and confident in operating their systems. The training portal offers flexible, self-paced learning at any time, while Go Live onsite training provides hands-on experience and personalized guidance prior to their first Go Live. This dual approach ensures that all users can effectively utilize Evolv's security solutions.

The Bridge Community: Being part of The Bridge Community offers clients the opportunity to collaborate and share insights, fostering a network of shared knowledge and best practices. This community-driven approach encourages continuous learning and innovation, enhancing the overall effectiveness of Evolv's security solutions. Members benefit from exclusive access to resources and support, strengthening their security posture.

3.0 Limitation of Liability

To the maximum extent permitted by law, customer agrees that ICU Technologies, Inc. shall not be liable for specific performance or for any indirect, incidental, exemplary, consequential or special damages of any nature, including without limitation damages arising from or caused by the loss of use of the products, loss of profits, loss of data or use of data, interruption of business, incidents, or lost revenues, even if ICU Technologies, Inc. is aware of the possibility of damages. Customer acknowledges and agrees that neither ICU Technologies, Inc. or its products can eliminate, prevent, or mitigate, in whole or in part, the occurrences of the events or threats that the products are intended to detect and that ICU Technologies, Inc., and its officers, directors, employees, or agents, shall not be held liable for any such failure (which may include without limitation, failure to detect threats, whether due to product failure, human error, customer's operating environment, or external forces outside ICU Technologies, Inc.'s control) or for non-productive time or product down time for any reason, or for acts by third parties that cause harm or damage. Customer shall be solely responsible for the acts or omissions of its personnel, contractors, and agents, including those responsible for operating the products and for the security of customer's premises, personnel, and visitors. ICU Technologies, Inc. shall not be liable for any claims, actions, suits, liabilities, damages, or losses related to or associated with the personal injury, death, or real or personal property damage arising from or related to any emergency situation, or any other use of the service whether in tort, contract, arising from a course of conduct, usage in trade, or otherwise. Customer acknowledges and agrees that the fees charged for the service are established as a result of the allocations of risk and responsibility described in this section (Limitation of Liability) and that ICU Technologies, Inc. would not have provided the service without Customer's agreement to the allocation of risk and responsibility set forth in this section (Limitation of Liability).
