

## **Consideration to Authorize the Administration to Solicit Bids for the Sale of Surplus Portables**

The district will soon have three surplus portables. One large 3-classroom portable at Edwards is currently available and two smaller portables at Hector P. Garcia will be available as soon as the semester is over.

State law requires that schools offer any open-enrollment charter school located within district boundaries the opportunity to acquire any surplus facilities. The administration has already notified Priority Charter School of the available portables. If Priority is not interested, the administration plans to solicit bids for the sale of the surplus portables.

After bids are received, the administration will present the results for approval of the sale of the portables at a future meeting.

**Recommendation:** Authorize the administration to solicit bids for the sale of three surplus portables.
