

First read of revisions to the board policies FDA(LOCAL) and FDB (LOCAL).

1. Background:

Board policy FDA (LOCAL) governs the admission of students into the district, and FDB (LOCAL) governs intradistrict transfers. In April 2026, we changed the FDA (LOCAL) policy to allow for transfers using attendance and behavior as factors. In addition, we allow all students to be eligible to apply for CAST STEM high school through an application process, and we have allowed for siblings to remain in the district if their other siblings are in good standing at one of our schools. In addition, through our transfer committees and administrative meetings, analysis shows that other factors need to be considered in both interdistrict and intradistrict transfers, such as grades and credits towards graduation.

2. Process:

Based on information provided to senior leadership and campuses for enrollment and transfers. The district would want more flexibility to accept interdistrict and intradistrict transfer of students at campuses where there is room in both the facilities and with resources, including staffing and program needs.

3. Fiscal Impact:

NA.

4. Recommendation:

Item of information.

5. Required:

None.
