

Faribault Public Schools Memo

Date: October 18, 2021
From: Katherine Schultz, Student Success Coordinator
To: Finance Committee

Subject: Ellevation Platform for ELs

The following memo requests approval for the quote from Ellevation to purchase Ellevation Platform, a data warehouse system specifically designed to meet the unique needs of the EL program, its teachers, and most importantly, its students. Not only will this Platform allow us to meet all compliance requirements, it will guide classroom and EL teachers to make data-driven instructional decisions for our almost 900 EL students. Other Big 9 Districts (Mankato, Austin, and Owatonna) have used this platform with great success. For a brief introduction, [click here](#).

The proposed cost of the software is \$17,231.25 annually for an estimated 900 EL students. The initial three year cost is \$38,083.13. This includes a 10% startup discount. These prices include training and staff development options for the EL team. This program will be funded through a combination of ESSER II and Title III funds.
