Subject: Recommendation to Purchase Pearson's *enVision Geometry I*

I am requesting the purchase of the 2018 *enVision Geometry I* be placed on the agenda for the May 22, 2017, Board of Education Curriculum Committee Agenda. The purchase request is for Teacher Resource materials, Assessment Readiness Workbooks, and Student Editions with a 7-year digital courseware license. The *enVision Geometry 1* text coherently develops mathematical concepts as well as opportunities to strengthen and apply skills and is the recommendation of the committee.

Mr. Ben Hillard, Mathematics and Science Coordinator worked with the committee of teachers that teach Algebra I and Geometry. They represented each of our high schools. The committee was formed in the fall of 2016. The committee of teachers agreed that if they could find a publisher that produced a coherent series, for Algebra and Geometry then concepts would flow coherently with fewer gaps. Geometry and Algebra teachers rated their text books separately then came together to discuss the series. The Geometry teachers developed a needs assessment for Geometry and spent extensive time reviewing our current Michigan State Standards and the Common Core Shifts for teaching mathematics. They also considered what skills "career and college ready" students need in order to be proficient. Mr. Hillard followed the district textbook adoption process according to Board policy and the Secondary Principals support the recommendation. In his attached memo, Mr. Hillard shares more details about the evaluation process used. The textbook samples are in our outer office for review. We will also have samples available at the Committee and Board meetings.

COURSE: Geometry
