

SUBJECT: Centegix Safety Platform Equipment and Software Agreement for a total yearly amount of \$652,250 for five years, not to exceed \$3,261,250 – *For Information Only*

BACKGROUND: The scope of this project satisfies and exceeds the legal mandates for silent panic alert technology from the Texas Legislature found in [Senate Bill 838](#) and [Commissioner's Rules Concerning School Facilities Chapter 61 \(c\)\(10\)\(B\)](#).

The CENTEGIX Safety Platform is a badge-based incident response solution worn by every staff member that empowers them to get help from school administrators or put the entire campus in a lockdown with the push of a button. This system includes room level location details and audio/visual notifications so that everyone on the campus, district administrators, and Pasadena ISD Police know that a site has been locked down. The platform provides coverage of the entire school grounds, including fields and parking lots. The platform also includes a comprehensive visitor management system and a dynamic digital mapping program that elevates safety management, planning, preparedness, and response.

FINANCIAL IMPLICATIONS: The total amount per year is \$652,250 for a total of five years not to exceed \$3,261,250. All services applied for will be covered through a combination of grant funds, general operating funds to include fund balance. This process secures the opportunity to receive additional savings to district for these specific services.

RECOMMENDATION: No action needed.
