

EE Online Update:

There are lots of great EE activities happening in our online program:

- 6-12 students have had the opportunity to participate in an overnight astronomy field trip and a 2-night Osprey Wilds field trip.
- Our middle school students are working on completing their civic action projects for the semester.
- High school students are working to complete MESS-E projects.
- Elementary students are spending time each week exploring science together - we were able to hatch some sea monkeys and they are now creating their own habitat.
- All students have been invited to add to an Earth Day presentation that will be shared with their fellow students.
- Our staff has been working hard to complete our asynchronous Excellence in Environmental Education training and we are almost finished.
- In response to our MESS-E program, our school has been nominated for a Minnesota Association of Charter Schools Award in the area of Encouraging the use of different and innovative teaching methods.

These are just a few of the things we have been working on to help support our community of environmentally literate students.
