

# PHYBS Proposal for Removable Fence

## Scope

PHYBS would like to replace the existing home run fence at Phantom Field with a safer and easier to install upgraded fencing system. 12 inch Sockets would be semi permanently installed around the outfield fence line which will provide sturdier and safer poles as well as an easier installation and removal process. Previous fencing systems were made of cheaper cloth and garden stakes that become dangerous over time as they bend. Previous fences were donated by various individuals and PHYBS is seeking financial support from D23 to upgrade to a safer more aesthetically pleasing more permanent system. The grand slam fencing system will cost approximately \$3800 and be installed by PHYBS.
