**Re: Update to Policy FDA (Local)**

Update Policy FDA (Local) to reflect the following change:

“Residents Who Become Nonresidents: Resident students who become nonresidents during the course of an academic school year may remain enrolled for the remainder of the semester, unless the student is classified as a senior in which case she/he may stay enrolled through graduation. In both cases, the student should remain in good standing with no academic, attendance or discipline issues.”

In support of this recommendation, we surveyed several surrounding districts including Carroll, Carrollton-Farmers Branch, Grapevine/Colleyville, Highland Park, Irving and Lewisville. Coppell ISD is the only district of this group that permits a nonresident student to remain enrolled until the end of the academic school. All others required the student to be withdrawn immediately, at the end of the current grading period, or at the end of the semester.
