Re: Purchase of Lockdown Shades

I would like the opportunity to present to the Board of Education information regarding the installation of lockdown safety shades and the proposed quote for additional work on this project across the buildings in our school district.

Background

Over the past year, we have been working on installing Lockdown Safety Shades in schools throughout our district. Many doors/sidelights in each school building would benefit from shades. The shades can be quickly pulled down during a lockdown to prevent visibility into classrooms. This is an added security measure designed to help protect our students and staff in the event of a potential threat or the immediate need for privacy.

Recommendation

We received samples from three vendors based on our initial series of orders. Among them, Taylor Nightlock, Clio, Michigan, provided the highest quality in the exact shades we required, at a total cost of \$45,095.68.

Please add this request to the agenda of the Monday, November 10, 2025, Committee of the Whole Meeting.
