

**Homedale School District
Transportation and Maintenance**

Parma School District is putting a new filter system to save sprinkler heads. The filter system costs about \$11,000.00. The amount we would save on sprinklers should pay back in about three to four years. Our average cost per year is about \$3,600.

The bids are in for the boiler demolition and HVAC upgrades for the cafeteria and locker room at the high school. If approved by the board the total cost for all three projects will be \$111,000.00. There was an alternate bid request with the boiler demolition to install a hot water storage tank. I have recommended not accepting the alternate as I believe we can get it cheaper through another company.
