Presentation on Customized Learning

The CISD Strategic Plan charges the district to “develop a system to ensure that each learner is actively engaged through a personal success plan which includes academics, service, activities and career aspirations”. As the district explores ways of meeting this strategic initiative, the district is piloting several programs that provide opportunities for choice and customization to meet the individual needs of students.

These programs are:

- Virtual Schooling
 - Virtual Courses Online (from CISD approved vendors)
 - Hybrid Course (A blend of direct teach, evening seat time and online components.)
- E2020
 - Turning Point – Major curriculum delivery system
 - Summer School – Utilized to credit recovery and original credit
 - NTH – Utilized for students who need a course that is not taught by a NTH teacher such as advanced math course of elective.
 - CHS – Utilized as a remediation tool for students who behind on credits.

A power point presentation and video will highlight components of these programs.
