Verkada Camera Upgrades

Verkada representative will give a demonstration on how the upgraded cameras function.

Plan is to eventually upgrade the entire district to these same types of cameras. Will explain in detail when needed.

Bomgar

Have completed the upgrade and we are now live with our new cloud based system. At some point in the next month or so, I will give a demonstration of how it works and why I chose this route.

Network/Internet Connectivity

In the process of upgrading outdated hardware to alleviate some issues we are facing. Have patched together what we have on hand to "limp" through until we place all new server blades/upgrades. There were many issues with our server blades and I have worked through most of those.

Barracuda Firewall and Filter

Upgrading to new hardware is on the horizon. Not quite sure of the process that will happen and if we will have any internet downtime whilst we upgrade. Looking at making this happen some time in the middle of June 2023. Will keep everyone apprised of the situation.
