

Minidoka County School District

Technology Dept. Report

February 17, 2016

Computer Disposal

- We are going to start recycling our computers with Recycle Boise. They are HIPAA Certified and guarantee that data has been destroyed on our disposed computers. They are able to take other technology like monitors and projectors as well. They come and collect the computers and dispose of them properly for free.

Labs/Testing

- There are two primary testing software programs that are used for ISAT, DRC and SBAC.
 - DRC is for the Science ISAT, Science End-of-Course (EOC), and WIDA. WIDA is new for our English Language Learners (ELL) online tests. The Science ISAT and the Science EOC are combined software. The DRC program has to be removed and reinstalled when changing from WIDA to combined Science ISAT/EOC.
 - SBAC is used for the Language/Reading and Math ISAT.
- We have setup and used some of the labs for the WIDA English Language Learners (ELL) tests.
- Minico has finished the WIDA test and have been switched to the combined Science ISAT/Science EOC test.

IETA Conference

- I was able to attend the IETC conference in Boise. I was trained on Linux, eRate, PowerSchool, physical wiring, and several other subjects. I was also able to connect with state technology staff and other district tech departments as well as vendors.

Work Orders

Work orders are not a good judgment in amount of work completed because we do several things that are not put into work orders and we do not track time worked on each work order.

- November
