Re:

As student-tracking safety devices are becoming more advanced, many now include recording or listen-in capabilities. Because of student privacy concerns, the updated policy would allow the District to require listen-in technology to be disabled while the device is on a campus.

This Board Policy Update includes the following LOCAL policy changes:

- FNCE: Student Conduct–Personal Telecommunications/Electronic Devices (replace policy)

Recommendation:

An appropriate motion for board action on Localized Update to FNCE(Local) is as follows:

“I move that the board revise policy FNCE(LOCAL) as recommended by TASB Policy Service.”
