## GOING FORWARD

My goal is to expand opportunities for students to engage both on stage and backstage, while also establishing our Performing Arts Center (PAC) as a space the entire community can see, use, and take pride in. I want to continue raising awareness for the importance of the arts by providing consistent opportunities for participation and engagement.

While I have the skills to create opportunities within our school, I will need support in reaching and involving community members more deeply. This includes recruiting volunteers and collaborators for plays, directing, events, groups, and clubs. Building these relationships will be essential for long-term success.
