Rural Education Program Funds

The last few years we have qualified for rural education funds. Unfortunately, as of the latest formula and information released from the federal level, we do not qualify to receive these for next year. This will mean an approximate \$28,000 cut to our federal funds. As of right now I have no other preliminary allocation numbers.

January Professional Development

We had a great districtwide PD day on January 24. Staff participated in various activities based on their content/discipline. We were able to partner with Gear Up to bring in DaNel Hogan with the StemAZing Project. She provided fantastic and engaging STEM professional development and we received very positive feedback. Some of the other topics discussed were ISAT vocabulary, interim assessments, StudySync Curriculum, and accreditation requirements.
