Subject: Re: 2161 W Wilson Rd - Pond

The ponds intended use will be recreational and will be maintained and kept clean and usable at all times. We will be stocking with fish and be using it for swimming and non-motorized water activities.

We will keep it clean by aeration where we will be installing three hardwired aerating systems. Kept at quantity or full level by natural means. No artificial methods will be used, no well or lake or stream will be feeding it.

Please let me know if that takes care of these two topics and when do you need the check by?

Thank you again
Bob Ellis

Robert,

I have gotten your information over to our pond committee so someone should be in touch with you to confirm a date and time to visit the property.

As I am looking things over to make sure that the process is as seamless as possible, here is a list of the items still needed:

Permit or written approval from County and EGLE

Approval from insurance company (in writing)

Statement on the intended use (in writing)

Statement to ensure the cleanliness, how you will keep it clean (in writing)

Statement as to how the pond will be fed, stream, spring, surface runoff or well (in writing)

\$800 planning commission meeting fee

Let me know if you have any questions.

Thank you,

Samantha Merchant
