

# Selected Charts related to Kindergarten Class and Birth Rates/Trends

# Kindergarten Class Size 1995-2017 and Births

- Births data from 5 years prior doesn't reflect in/out migration that may happen in the intervening years
- BSD Kindergarten class size relative to Washington County births appeared to level off in early 2000s, after a decline from the mid-1990s.
- 2015 and 2010 were the two largest Kindergarten classes (both were Full Day Kinder expansion years)
- Drop in total births in 2010 (2015 K class) may have been offset by in-migration to BSD and Full Day Kindergarten expansion in some schools

# Kindergarten Classes Size – Recent Trends

## 2009-10

Average Kinder cohort per school: 83

Smallest: 39 (Cedar Mill)

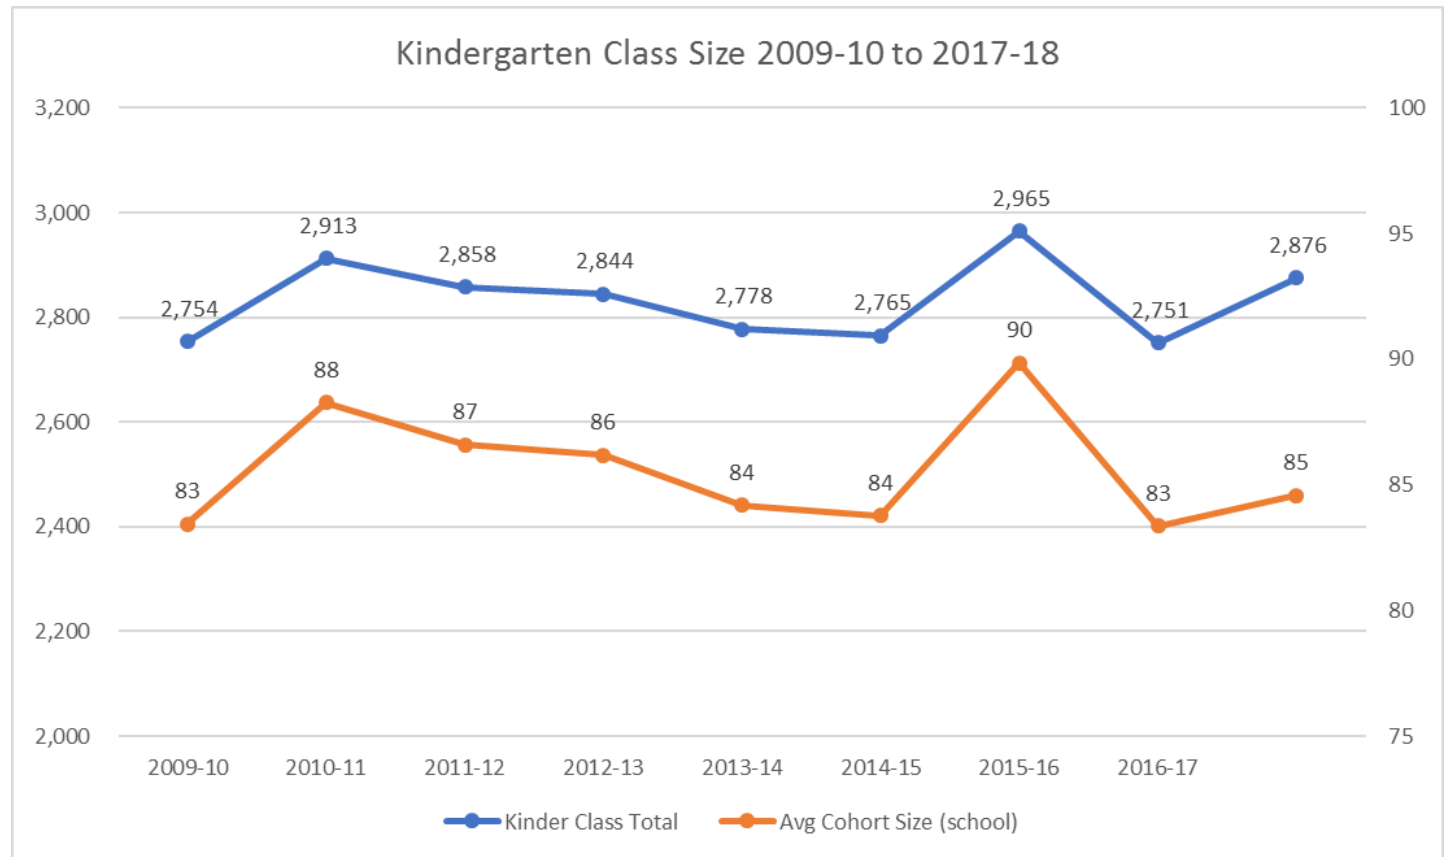

Largest: 152 (Barnes)

## 2017-18

Average Kinder cohort per school: 83

Smallest: 35 (McKay)

Largest: 131 (Elmonica)

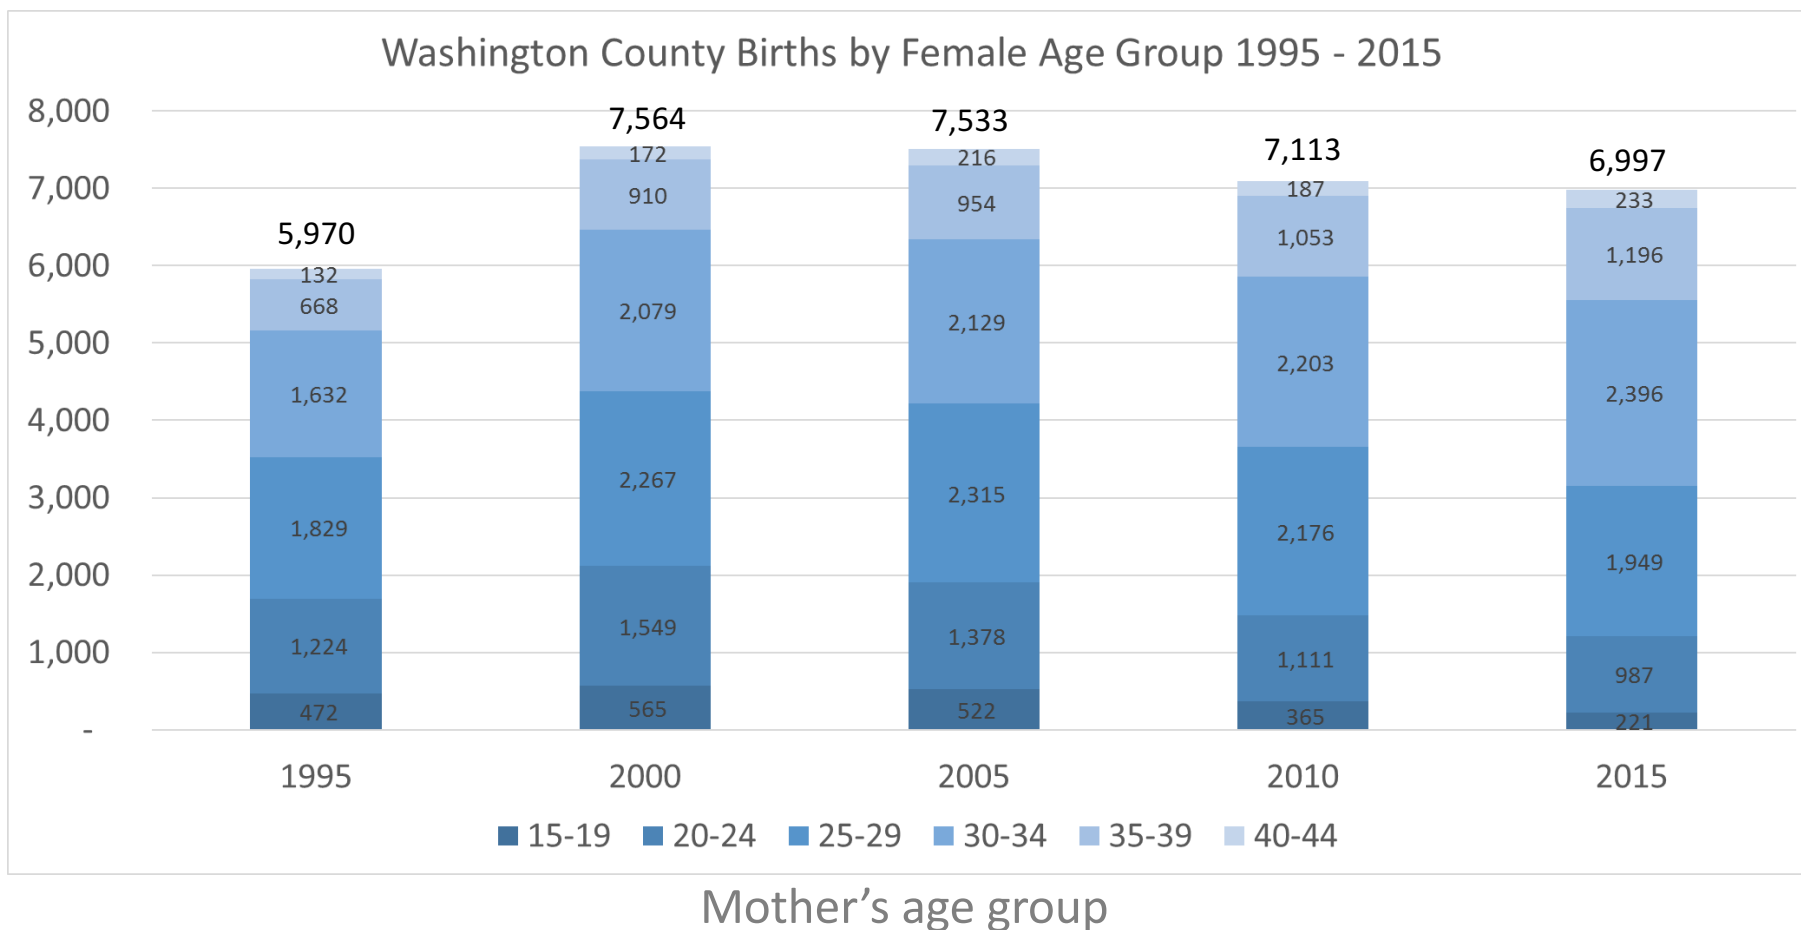

# Birth Trends in Washington County

## Comparative Total Births by Age of Mother 1995-2015

- Dramatic change in the # of births by age of mother
- Substantial decline in births to mothers younger than 25
- Modest increase in births to mothers aged 30-39

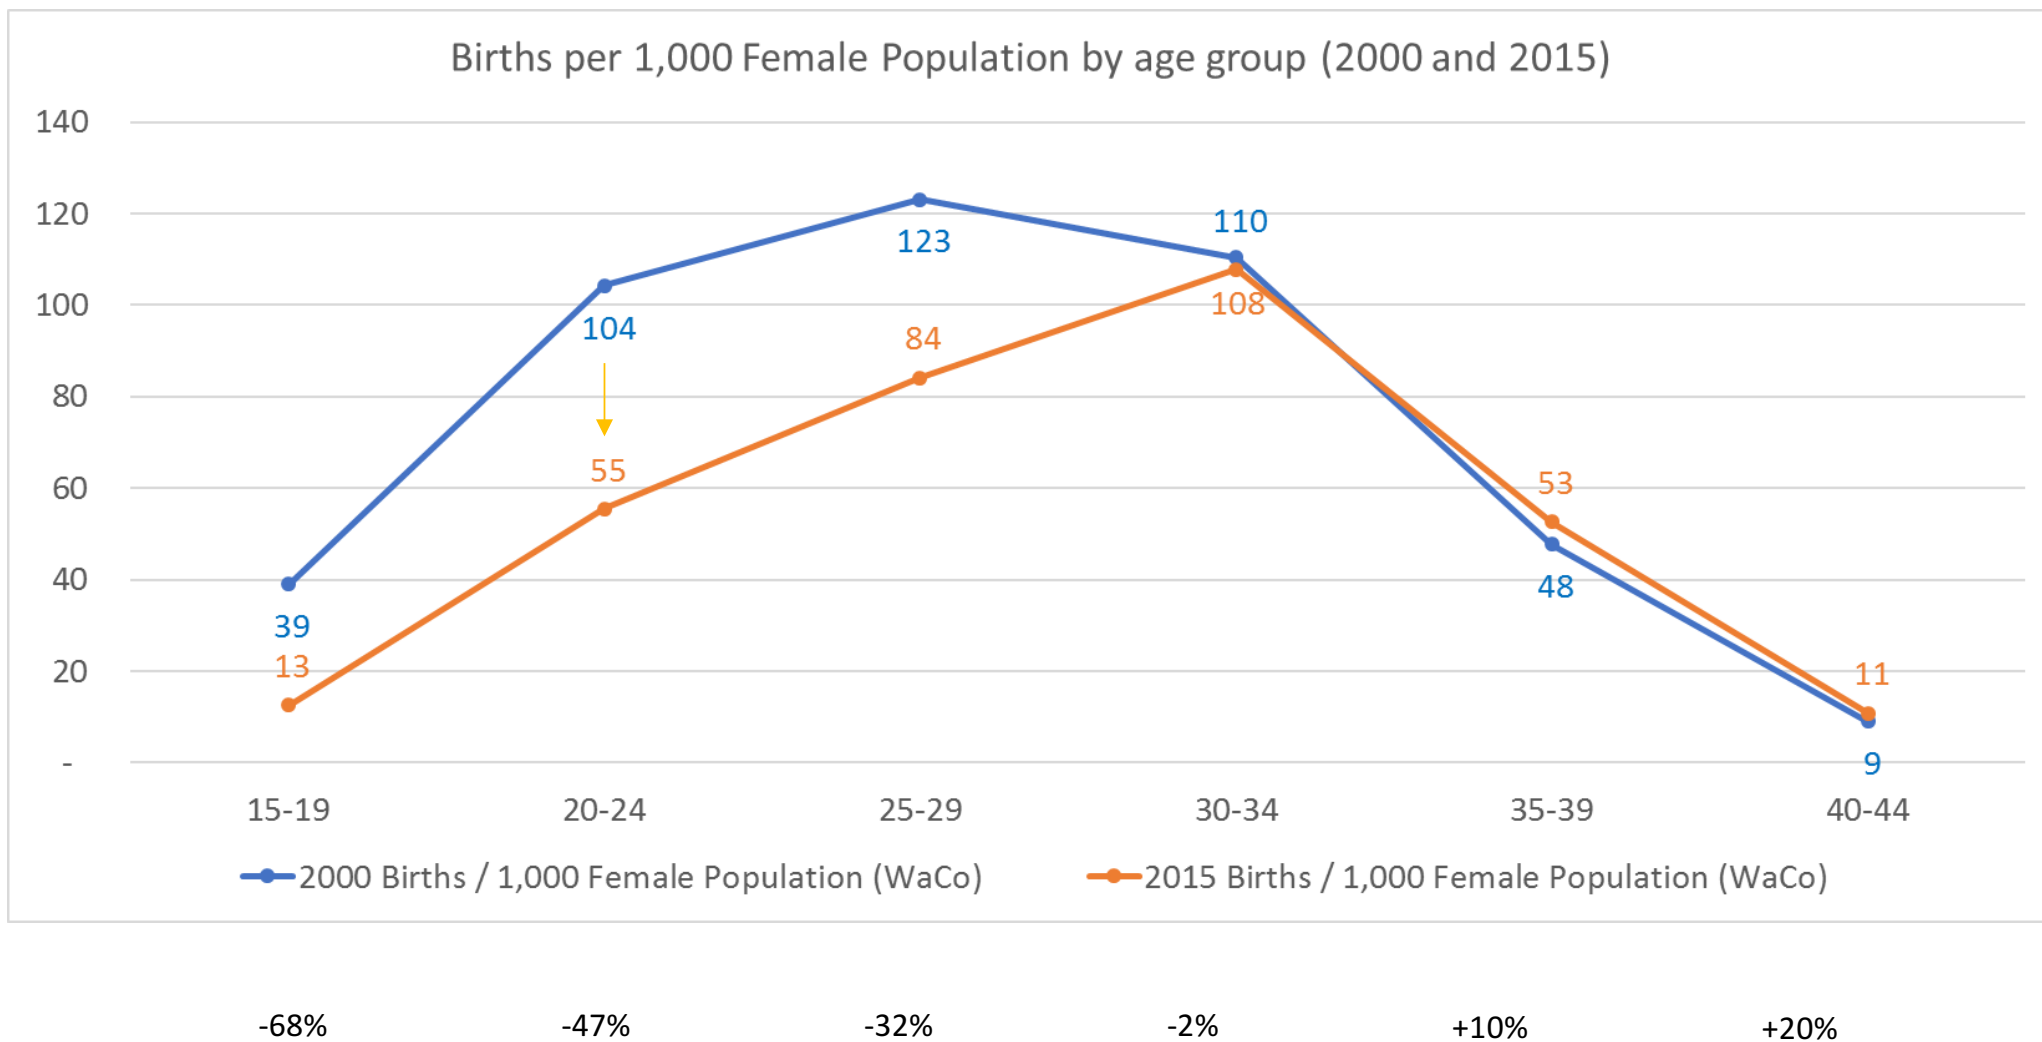

# Births per 1,000 by Age Group (2000 and 2015)

## Washington County

- Drop in birth rate for females younger than 30 – relatively steady for those over 30

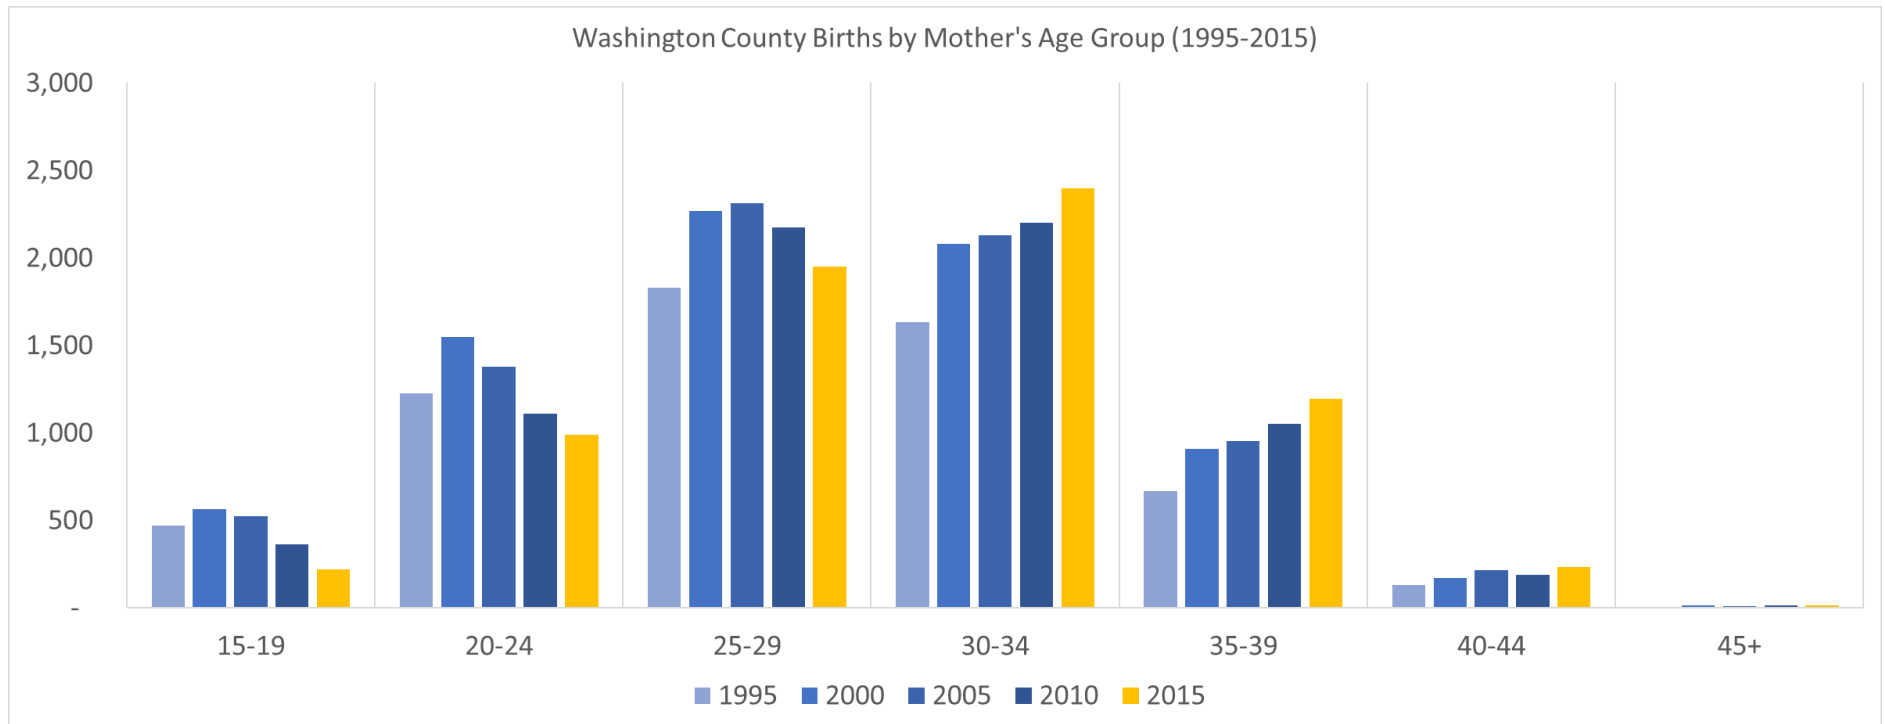

# Washington County: Trends in Births by Age of Mother

## Five-year increments for Washington County

- Substantial decline in births to mothers younger than 25 and increase in those aged 30-39

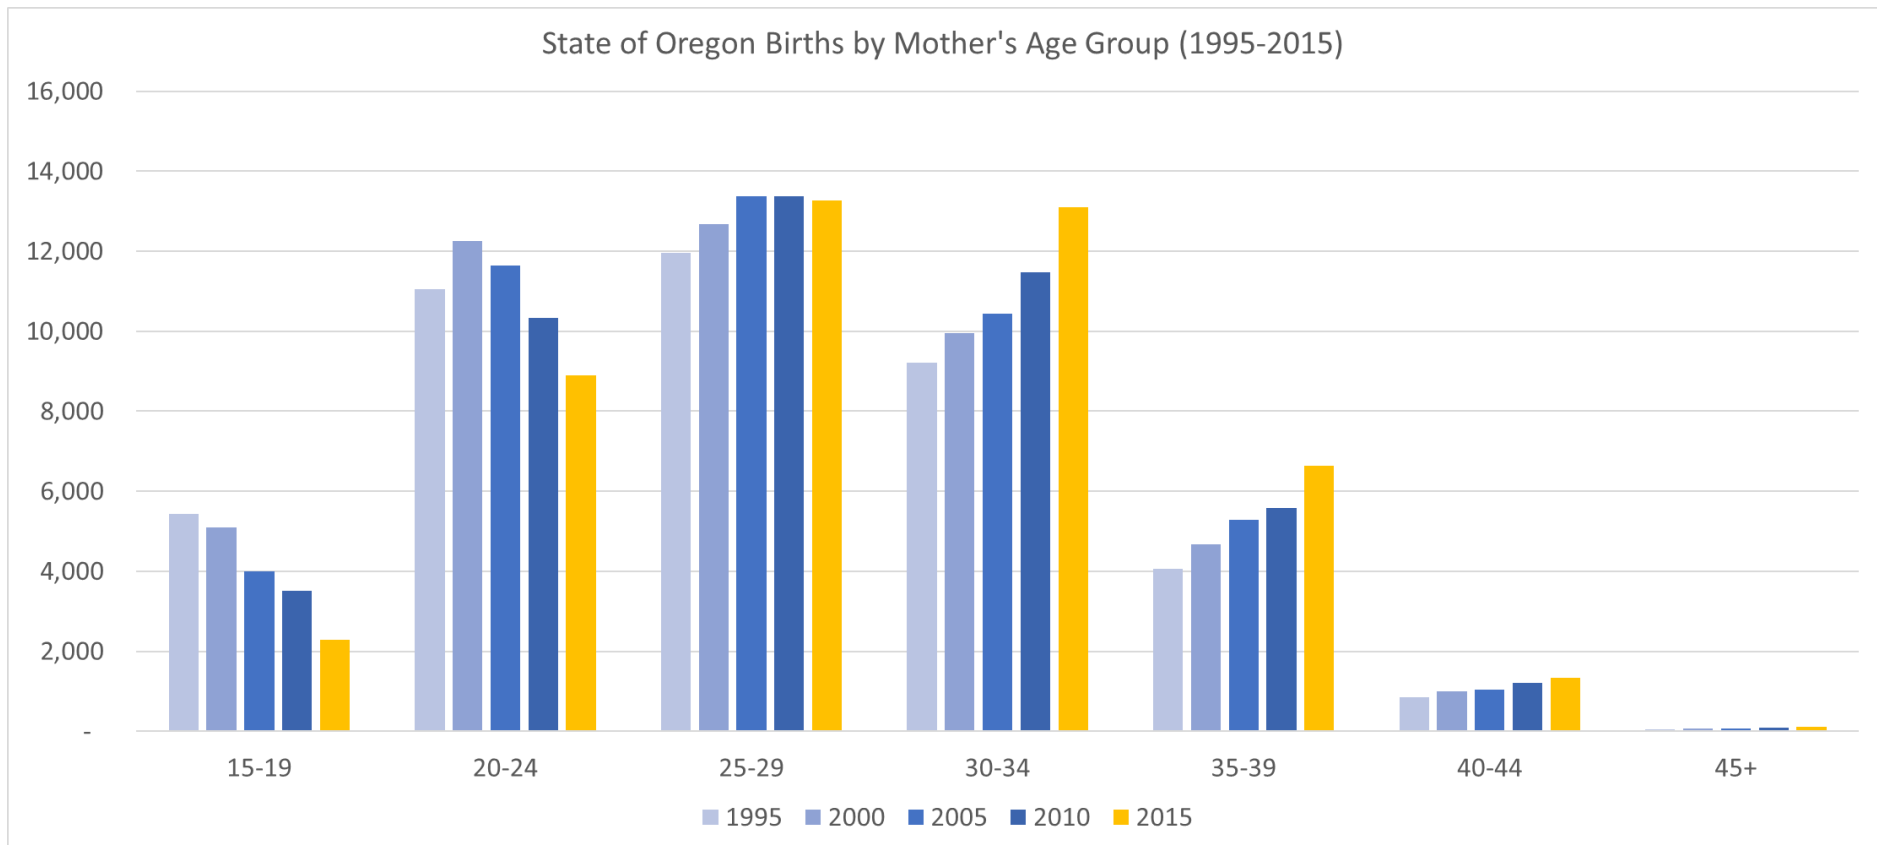

# Oregon: Trends in Births by Age of Mother

## Five-year increments for State of Oregon

- Washington County follows similar trends observed statewide

# Births per 1,000 by Age Group (2000 and 2015)

State of Oregon

# Female Population Age Structure and # of Births

## Washington County

- Dramatic change in the # of births by age of mother when comparing 2000 and 2015
- Substantial decline in births to mothers younger than 25 and increase in those aged 30-39
- Increase in births to those in their 30s not offsetting drop in earlier age groups

# Age Cohort Mobility

- Those in their 30s are less likely to have moved in the last 12 months – i.e. they’re more likely settled in their home or community
- This could be beneficial to BSD – more families having children in their 30s are more likely to remain
- But on the other hand, BSD may also not benefit from as many families moving into the District if they are already established elsewhere

% of Age Group who have moved within the last 12 months

Age Group	Portland Metro Region	Washington County	Beaverton School District
20 to 29 Years Old	38%	39%	41%
30 to 39 Years Old	23%	22%	24%
Total	18%	18%	18%
