

International Trucks of Houston

fka Olympic International Trucks

Melinda,

Per our conversation 9/4/2014 and the written estimates I have provided for West Orange CCISD. International Trucks of Houston will replace the fuel tanks, injectors, fuel filters and flush the fuel lines on the 28 2010 model IC buses in your fleet for a total parts and labor of \$211,295.90. This includes the 6 MaxxForce engines in your handicap equipped buses and the 22 full size busses equipped with the MaxxForce DT engines. Please note that there is a possibility of unforeseen damage due to the amount of water and rust in the fuel tanks you could see damage to other components such as the high pressure fuel pump.

Gary Harryman
