ON-TRACK TO GRADUATE

Students earning one-quarter of graduation credits in their 9th grade year.

ON-TIME GRADUATION

Students earning a diploma within four years. Cohort includes students who were first-time ninth graders in 2020-21 graduating in 2023-24.

FIVE-YEAR COMPLETION

Students earning a high school diploma or GED within five years. Cohort includes students who were first-time ninth graders in 2019-20 finishing in 2023-24.

District Goals

Three Rivers School District continues to be guided by our core values: Student Success, Life-Ready Learners, fostering a Culture of Care, engaging families and community, while keeping school safety as a top priority. We are grateful our school board has upheld these values for many years, enabling staff to align efforts in support of these priorities. We firmly believe that student success will not be determined by race, ethnicity, language of origin, family economics, gender, sexual orientation, gender identity, ability, disability, or religion.

State Goals

The Oregon Department of Education is partnering with school districts and communities statewide to reach a 90% on-time graduation rate by 2027. Anchored in the pillars of Academic Excellence, Belonging & Wellness, and Accountability, ODE prioritizes evidence-based strategies that strengthen early literacy, improve attendance, and deepen student engagement. We are committed to eliminating opportunity and achievement gaps for historically underserved students. By investing in culturally responsive practices, cultivating inclusive school environments, and fostering a culture of continuous improvement, we can help ensure every student thrives.

Opt-Out and Exemption for the state assessment

English Language Arts and Math - Oregon law (ORS 329.479) permits parents/guardians and students 18 years or older to annually **opt out** of Oregon's statewide tests in English Language Arts (ELA) and/or Mathematics. The school provides any student who is excused from a statewide ELA or mathematics test with supervised study time while other students are testing.

Science - Under Oregon Administrative Rule 581-022-1910, a "school district may excuse students from a state required program or learning activity, where necessary, to accommodate students' disabilities or religious beliefs." A parent/guardian may request their child be exempt from taking the science assessment.

3rd grade math

Students collect beads to do a craft project.

- Claire collects 7 beads.
- Lucy collects 4 blue beads and 6 red beads.
- Regan collects 3 more beads than Lucy.
- Mary collects 2 yellow beads and 4 pink beads.

They put all of their beads together and then share them equally. How many beads does each student get?

8th grade math

Select the two possible values for x in the equation $x^3 = 125$.

☐ $\sqrt[3]{125}$

☐ $5\sqrt[3]{1}$

☐ 25

☐ 5

☐ $10\sqrt[3]{(1/2)}$

The Paradox of Digital Civic Engagement

In recent decades, the rapid expansion of digital technology has reshaped nearly every aspect of civic participation in democratic societies. Citizens now possess, quite literally at their fingertips, vast archives of information about government actions, public policies, and global events. With a single click, a person may sign petitions, comment on legislation, or broadcast political opinions to thousands of people. Yet the very tools that promise a more involved and informed public present a set of challenges that policymakers, educators, and voters themselves are still struggling to understand.

Before the emergence of social media platforms, civic engagement generally depended on local meetings, physical ballots, and in-person debate. These methods demanded time, deliberation, and direct interaction among citizens. Today, however, digital participation often occurs in seconds and demands little more than an Internet connection. Supporters argue that this shift has empowered individuals whose voices were historically underrepresented. They credit online platforms with elevating marginalized viewpoints, expanding access to public forums, and enabling rapid mobilization in moments of social urgency.

Despite such benefits, the influence of digital technology on civic life carries significant complications. A growing collection of research indicates that online environments can distort information, reward emotionally charged language, and contribute to political polarization. Algorithms—designed primarily to maintain user attention—may unintentionally amplify misleading content or bury dissenting perspectives. In this way, the mechanisms meant to broaden participation may narrow the range of ideas to which citizens are exposed.

Another concern stems from the increasing role of private technology companies in public discourse. These corporations, whose primary responsibilities are to shareholders rather than voters, design the digital spaces where much of civic life now occurs. Their decisions about what content is promoted, restricted, or monetized have far-reaching implications for political dialogue. While many citizens welcome efforts to curb misinformation, others fear that excessive control could suppress legitimate debate and compromise democratic principles.

Still, the digital age holds considerable promise. When guided by transparent policies, responsible design, and informed citizens, technology can strengthen participation and support a healthier democratic culture. But achieving this balance requires careful attention. Just as earlier generations navigated the influence of newspapers, radio, and television on public life, today's society must learn to integrate digital tools without surrendering the thoughtful engagement on which democracy depends.

11th grade English Language Arts

1. Which sentence from the passage best supports the conclusion that digital engagement can unintentionally limit the variety of perspectives citizens encounter?

- A. *"Before the emergence of social media platforms, civic engagement generally depended on local meetings, physical ballots, and in-person debate."*
- B. *"Supporters argue that this shift has empowered individuals whose voices were historically underrepresented."*
- C. *"Algorithms—designed primarily to maintain user attention—may unintentionally amplify misleading content or bury dissenting perspectives."*
- D. *"Still, the digital age holds considerable promise."*

11th grade English Language Arts

2. Which detail from the passage best supports the idea that technology companies have significant influence over modern political dialogue?

- A. *"Citizens now possess, quite literally at their fingertips, vast archives of information about government actions."*
- B. *"Their decisions about what content is promoted, restricted, or monetized have far-reaching implications for political dialogue."*
- C. *"Today, however, digital participation often occurs in seconds and demands little more than an Internet connection."*
- D. *"When guided by transparent policies, responsible design, and informed citizens, technology can strengthen participation."*

5th grade Science

Rabbit Fur Inheritance Problem

Fur color in rabbits can be tan or white. Some rabbits have solid tan fur and some have solid white fur. Other rabbits have both tan and white fur and are called spotted rabbits.

Figure 1 shows a tan male rabbit and a spotted female rabbit. These rabbits have babies; some are tan and others are spotted.

Figure 1. Parent Rabbits

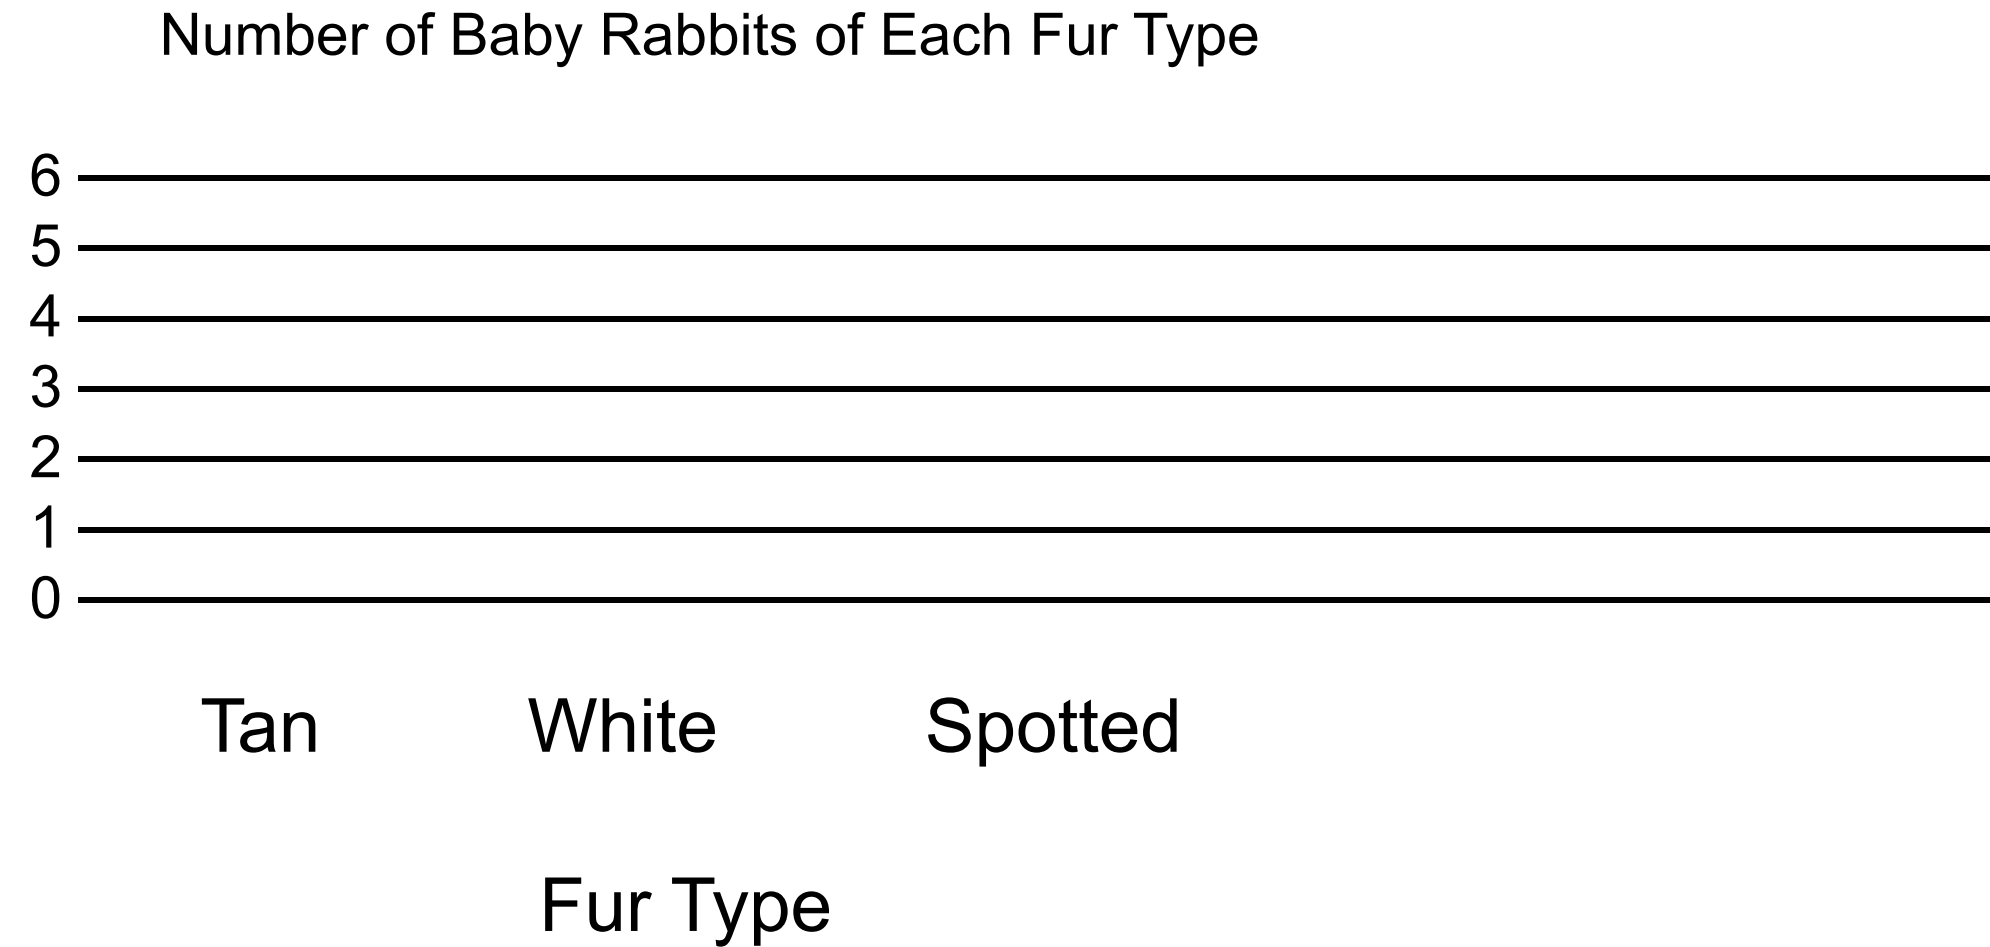

A group of baby rabbits born at the same time is called a litter.

This is the fur color of the babies in two litters produced by these parents.

Litter One	Litter Two
• Tan	• Tan
• Spotted	• Tan
• Spotted	• Spotted
• Tan	• Spotted

Part A

Create a bar graph showing the total number of baby rabbits of each fur type.
Include the babies from **both** litters.

Part B

Choose the statement that **best** describes the number of baby rabbits of each fur type.

- A. There are mostly white rabbits.
- B. There are mostly spotted rabbits.
- C. There are about equal numbers of each fur type.
- D. There are about equal numbers of tan and spotted rabbits.

Part C

Select the correct phrase to complete the statement.

The spotted rabbits  inherited their fur pattern from one of the parents.

- ☐ must have
- ☐ might have
- ☐ could not have

Part D

Choose the **most** likely explanation for why all of the baby rabbits have some tan fur.

- A. The babies can inherit tan fur from both parents.
- B. The babies can only inherit tan fur from one parent.
- C. The babies cannot inherit tan fur from either parent.
- D. The babies cannot inherit tan fur from both parents.
