What factors influence your decision to have your child enrolled in the Bagley School District?

	Location	Location
	Convenience	Relatively small school, good teachers
Live here		Live in close proximity
	Location	Small school and it's not Bemidji
Activities available		We live in this district and the education in the elementary was good.
Location	Where we live and sports	This is where my husband and I went to school and we enjoyed going to the school when we were young.
The bus goes by our driveway and picks him up.	Different atmosphere then her previous school	Smaller school with good values.
	Living in the district	It was where we purchased a home, we like the area
Close	Small town	<div></div> . We would be enrolled elsewhere if it wasnt for her being as amazing as she is.
Child was pulled for the above reasons	Where we live	Location, curriculum
Where we live	Only option in a rural area with bus transportation	Distance to home
As of today... my children are enrolled to participate in sports and socialization. We supplement education with home programs as I worry my children are not learning the necessary skills in the classroom. Teacher unfortunately are no longer teaching and depend too heavily on slides or tech programs. Or are too occupied with behavioral students to be able to teach.	proximity to district	Where i reside i
Close to home	Where we live and work.	This is home
	Reputation and convenience since I have a business in town, and as a former student! Proud	Solid district, good staff and activities

	of Bagley High School! Bagley High School is why we open enroll!	
It is were they started school so we would like to keep them there.	Location	Distance
It is close to home and work		Location
All rejections of woke ideology.	Our kids are already establised with friends otherwise we would look at other options	Location
Proximity to home, familiarity with faculty	Location	Residence
Close to home	A good experience	This is home.
We live here.That is the only reason my kids attend this school.	We live in the Bagley school district.	This is home.
Smaller school , Less kids	Smaller school district, better help and grades	Have one in school and one on line. This is close to home. My hope is that my kids would have a good experience like I had going to BHS, that they would get a good education.
In district, we graduated from there	We live here and have family here	
A great schooling experience, do they dread going to school, is their joy?		Close to home
Access to a strong trades foundation	Child is enrolled in PSEO	Bus route. Other family attended and graduated.
Only because it is local and enrolling my child in a surrounding district would be difficult because of transportation.		Location
My child needs to take there place in the world not be insulted from it.	location and extra curricular activities	We live here. No other factor.
We live here. No other factor.	Location.	
Where we live and work.	Live in the school district and sports	
Live here	Relatively small school, good teachers	
	distance to home	

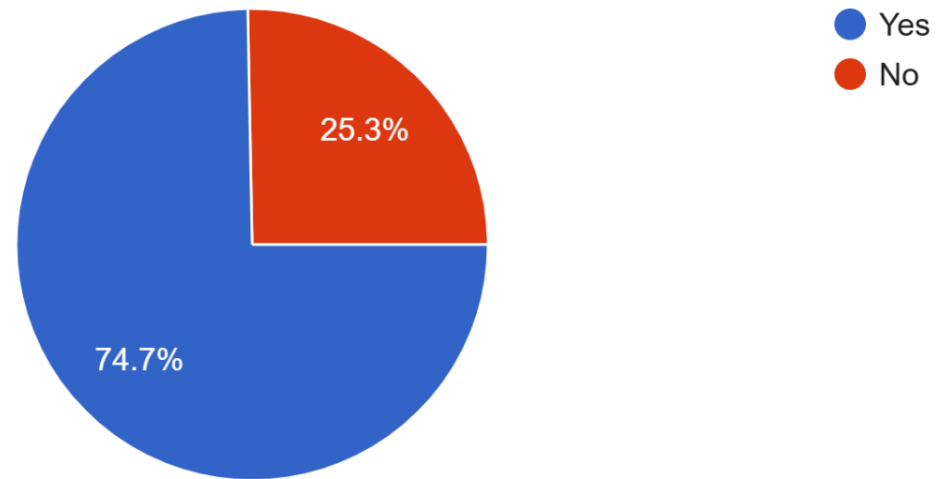

What educational values do you prioritize for your child?

82 responses

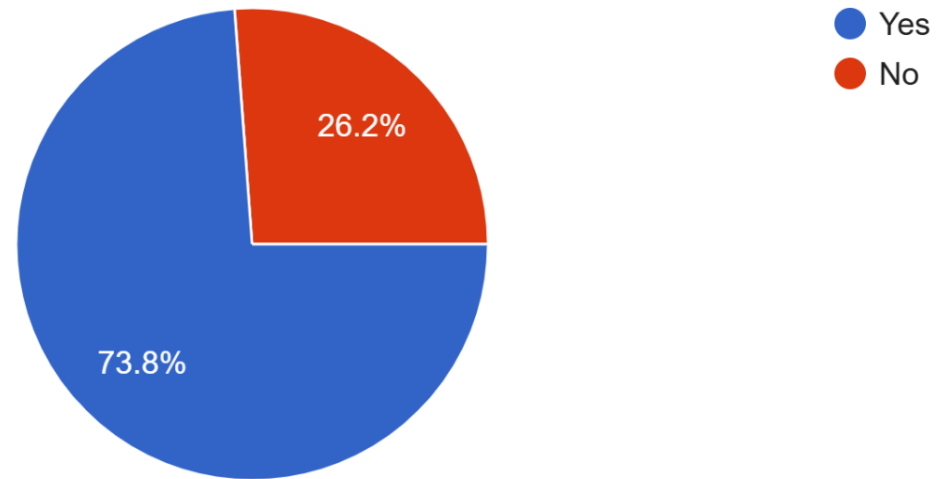

Would you support a referendum to prevent cuts to staffing, activities and/or programs?

83 responses

Would you support a 4-day school week?

84 responses

What reasons might lead you to support or oppose a four-day school week?

	Longer days would hinder learning. Too much packed into 4 days.	
		Might reduce transportation and hvac costs
I'd rather see that than cut activities. You will lose more students if you start cutting classes and activities.	I have reservations regarding a 4 day week, but am not opposed. My concern is less related to students, and more towards hourly staff (paras, custodians, cooks, etc.)	Other districts have had success and students prefer 4-day week
	3 day weekend would be nice.	5 days a week shorter days. Bus ride already makes it a long day the way it is
None	More time with our children	I would love to be able to schedule appointments without my students missing class work. I also have teenagers that would like to be able to work on that extra day. My teens would feel a lot less pressure for time when finishing homework.
There are other places that the school district can save a few dollars here and there	No opinion either way	If a 4 day school week would help save money I would be for it.
Cheaper for the school	I feel 3 day weekends are the best for anyone	Kids are already behind academically. Need 5 days to do some catching up.
	Sports	It would really depend on if that meant longer days as in more time in school each of those 4 days to make up for 1 less day.
	More home time	How are they going to be able to get through their curriculum if they cut back a day? The school days are long enough as it is, so are you going to make those 4 days they attend a longer day? Kids have enough trouble making it through the time that they are there. Not to mention the little bit of food the school actually serves wouldn't get them through that time frame. Are they going to offer more? How will that work with the extra curricular activities? They won't go that extra day either? Or how does that work with coordinating things with other

		school districts? How will it affect that?
Don't care just give kids what they deserve to learn	More time at home, appointment days.	Scheduling, everything in this world is prepared for a 5 day week
More time with family. Improved mental health during long school weeks.	To long of a year	
Oppose :longer school days. Support :for more home time for students.	not enough information on pros and cons	As a society We put to much on our children.
Maybe the kids wouldn't feel like there always at day care		not enough savings for the district
Students need a break, staff need a break	I absolutely oppose a 4 day week... we open enroll to have a 5 day a week with the education that we love from a small town. My kids are 3rd generation students at Bagley High School, and I am proud of that!!!	
To long of a day for there attention span and parents typically work fridays	I would support it because it gives a little freedom. Helps staffing shortages.	Time with family, mental health
Longer school days, academic impact, work schedule adjustments	Strain on families	
I support it because of efficiency.	It depends on how much longer in the year the kids would have to go to school. And the hours in a day.	Information overload
I feel that the school should do what they can to run more efficiently and safely without compromising education		For us it would be easier. It may be an issue for parents who work five days a week.
Easier on kids	Would be beneficial	Gives a great balance to the week. I know it would be less stressful on the kids week to week too
I have no reason to oppose. A four day week would help the staffing shortages and make it easier for staff to schedule medical appointments without requiring sub coverage. Might help improve overall attendance. Saves money.	I haven't been informed on how this would be different from the schools current schedule. I would like the to be a selection for other for the school schedule.	Gives a great balance to the week. I know it would be less stressful on the kids week to week too
Increased family Flexibility	I support this because of budgets and it's healthier on kids and teachers	If school taught in a way that students got more hands on school work then book work there would be no reason for 8 hour days 5 days a week. May

		cut down on staffing issues. May save money, no buses going, no lunches cooked.
Better use of time, opens up more work opportunities for older kids,	I work so would not like a four day week	
I believe we'd be working smarter and not harder on a 4 day school week. More time for family.		Easier on kids
Support so students have other opportunities.	Parents struggle enough with the scheduled 2 hr late days. Thankful my child will be done next year	I think it would be a good thing for the children.
It would give a day for appointments so students don't have to miss school and get behind in classes.	If it saves money and results in fewer cuts to staff and programs offered	It would cut cost for the district and allow students an extra day off and teachers extra time off or extra time for training/prep
	I think it is better for the kids to get out of the house and not be at home so much. I feel kids already are on electronics so much they need social interactions.	None of which I am aware.
None of which I am aware.	Prevent teacher burn out. More positive learning impact for students, especially in high school.	
	I would like to see the kids get more out of their day and less days per week.	
Another job	Might reduce transportation and hvac costs	
	depends on what day it is	

Do you have any other key information or suggestions you would like to share that was not previously addressed?

		Address the vaping and random violence problems
The school administration needs to self reflect and look at the real reasons numbers are going down so much. Time to make some changes and get students back.	<p>The high school needs more outreach to parents via social media, parents don't read "the bulletin" - most of them have no idea what goes on at school for their child once they leave the house.</p> <p>le: let parents see how a class is doing a fun project, let them know what's for breakfast/lunch in a fun way, engage parents, encourage striking up conversations and talk with their kids about school happenings.</p> <p>Another area to work on is community building. People are too quick to jump on a "chit chat" site and bash the school- employees and teachers are not defending the school, which is not only sad, but projects badly on the school within our community and other communities.</p>	<p>Kids need to feel safe in order to learn, if the school is not a safe place they will not be able to learn. More attention to student interactions with peers. Staff do not need to be friends with students. They are there to teach and guide.</p>
	No	Speech team debate team would be nice
No	No	<p>I would love Bagley H.S. to have an online home/school option. I also would love our school to work with the businesses of our community to have a class/work option. For example; a class where students get introduced to nursing. The county then comes in to train students to obtain their certification (CNA) and work at our local nursing facilities. This is a jumpstart for students into a lifelong skill/job. I have seen other schools in our area doing this.</p>
		I feel offering completely online classes really hurts our students and our school as a whole. These kids need to be in school.

		No
	More schoolwide support of athletics and other extracurricular activities. More assemblies, there doesn't seem to be much peer support across the board.	My student is often not challenged and seems to be bored more frequently in school. Would be nice if teachers noticed this and gave more options for extra credit or more challenging topics perhaps.
The teachers need to leave there personal lives and opinions at home and keep there pants up and actually show support like a day care does cause they're not teaching when they're always on there phone and kids are on the computers		I think the administration needs so much work. So much corruption, lies and deception there. Fix that and I think other things will come into place. Sad when my own child tells me that she doesn't feel safe at school or that she feels she can't honestly talk with adults there.
Lack of support from school itself	No	
The school needs to improve in several areas. The school has continued to decline and underdeliver. The teachers are great, but those above (excluding several board members) are running the school into the ground. They want a higher pay, while cutting important programs and staff. Put the kids first.	The bullying	
More discipline for students who are a constant distraction to other students. Support students who are there to learn and want to learn. Give them the tools and learning environment to be successful. Also more after school clubs or activities would be nice as well.		
All kids deserve extra help when falling behind not just pushed threw		
Updating lessons, not using lesson plans from 2008. Lesson plans and activities should continuously be updated to meet students needs not be reused because it's what's easy to do. Stop teaching as a fill in the blank packet, test, then move on strategy. There's no teaching happening. More hands on activities! Stop using computer based quizzes if their not actually creating the quiz themselves. (Wayground	None	Vaping issues at the school

quiz at a University level for 9th graders) Classroom management- so students want to stay in class Addresses all kids behavior in sports and not, follow through and hold accountable.		
Grade assignment in a timely matter with an actual deadline of when assignments have to be turned in. Way to much back and forth on grades. One day kid is failing and the next one or two assignments are handed in and graded and now the kid has an A, it's frustrating. Also kids get to wait weeks before handing in assignments and they still get full credit which doesn't teach kids to meet certain deadlines.		I don't know the solution, maybe metal detectors... but the vaping problem needs to be addressed. My kid shouldn't be around that, nor get roped in when they are just trying to use the bathroom.
All teachers must realize, they are only teachers, not the parents.		More opportunities for work release. More classes pertaining to the trades.
	Better classroom management, consistency, all across the board, ... phones are an issue, stop the packet learning, the kids ai as a resource, no critical thinking anymore	
The district continues to face significant challenges: declining enrollment, low test scores, consistently underperforming athletic programs, and a lack of field trip opportunities for elementary students. These issues highlight a need for a new direction and more engaged leadership. It's time for a change in administration. It really says a lot about their lack of commitment and investment that not a single one of them actually lives in the community they serve.	Absolutely, why can kids get picked up on the bus for school in the morning, but can't get dropped off after school? The weather has allowed my kids to stay home in certain conditions because it's to cold for these children to be walking home.	
		Address the bathrooms! They are used for everything but going to the bathroom.
If there are cuts again, it needs to start with admin. All other staff areas have been cut or affected	offer more hands on classes and ones that get kids involved	

already.		
Students need real instructional teaching, not just packets. Packet-based instruction without direct teaching isn't supporting most learners and leads many students to rely heavily on AI instead of developing true understanding and mastery of the material. I would also like to see consistent enforcement of the phone policy, as written in the student handbook, to help maintain focus. Strong instruction paired with firm, consistent classroom management would greatly improve student learning and success. Too many wishy washy teachers with chaotic classrooms. Also, no more curriculum that is 20+ years old, keep it fresh and up to date. Know what your teachers are teaching.		
The images that Bagley School has not kept up and is falling to drugs and disciplinary issues. Influence is not good. No significant trades classes.	Give the power back to the teachers, they can't teach what they should because they are tending to petty issues that parents should be dealing with. Have more choices for kids to take for classes. Get Bagley to start their own online school.	
I have already started homeschooling one child and would prefer my other child homeschooled as well but I am leaving it up to them. In Bagley Schools behaviors are out of control, many teachers are no longer teaching and are instead throwing busy work at students, and students are not learning the skills they need to succeed in society today.		My opinion but early outs are way easier than late starts
If you want parent or community involvement you need one master calendar with all school activities in one place. Arts, sports, conferences, activities all have a separate calendars. It's easier to just not be involved. Facebook is not the answer. We don't need more reasons to justify social media use.	Thank you for all you do to support youth.	

	District Office needs cut backs when they do not even process their own payroll and the Superintendent does nothing to contribute. Superintendent does not care about students and staff. We also need teachers to actually want to help kids with their assignments such as HS math.	
Offer more and exciting hands on classes	Address the vaping and random violence problems	

Would you support a phone ban at Bagley High School?
