

Review of New School Construction Costs:

I will be presenting you a spreadsheet with the break down of the costs of construction for the new school.

To give you a little background the board in 2009 put together an assigned fund account for New School Construction. The initial amount was \$250,000.00 and additional dollars were added at later dates. The total funds in this assigned account was \$600,000.00

The dollars in the assigned account were used for the costs of the two referendums and the miscellaneous costs incurred by the district leading up the construction of the new school. These assigned dollars were available to be utilized for the new school construction.

In the 2018 - 19 school year, the remainder of the these funds have been spent on the final payments to Wieser Brothers, ATS&R and the development and construction of our athletic fields.
