Please find the following descriptions and cash price per each bus on a new 2023 model or newer Blue Bird "VISION" 71-passenger size Type C Conventional School Bus with a Gas engine (2022 EPA Emissions) with seating capacity for 71-passengers. The additional cost for the optional equipment (is designated with price out to the right) and these options are included in the net cost of each bus of **\$139,710.00**. All the other options are either standard equipment or required by the current State or Federal Specifications. Delivery will be in approximately **260 DAYS** after receipt of order.

This quote expires without notice 30 days from the transmission date or upon Blue Bird's exhaustion of production slots for Model Year 2023, whichever occurs first. Blue Bird also may rescind or reprice this quote at any time, for any or no reason, before receipt of your written purchase order.

The line item listed as "Surcharge" is increases the manufacturers have received from their suppliers of switches, wiring harnesses, engines, EPA emissions, steel, vinyl, A/C parts etc. Unprecedented world events in the last several months, including the war in Ukraine and continued COVID lockdowns in China, have once again thrown supply chain into disarray. In addition, exorbitant cost increases in raw materials, diesel fuel, freight and labor as well as an inflationary environment never before seen, has caused Blue Bird to continue to increase pricing. We are hopeful supply chain and material costs will begin to level out in the coming months and look forward to a more normalized market. Blue Star Bus Sales has no choice but to pass the additional costs from the manufacturers on to the end user. Blue Star Bus Sales is committed to supplying the customer the best quality bus available.

These bus will meet or exceed all the requirements of the current State of Texas Specifications as Published by the Texas Department of Public Safety that were in effect at the time of order of the bus from the manufacturer.
