13 students tested

PERCENTILE	NUMBER OF STUDENTS	PERCENT
Below 25 th	2	15.4
25 th to 49 th	3	23.1
50 th to 74 th	2	15.4
75 th and above	6	46.1

Report from Ms. Fenners Class (K-2)

Greetings from Ms. Fenner's Classroom. During the month of October a lot of learning took place and our ISIP and STAR Math scores improved. We also had a lot of fun learning during writing and science. The students explored different ways that writing is used. They viewed a Halloween cartoon, "Scardy Pants" and completed a story map afterwards. Then they used the events from the story map to draw illustrations and write a sentence about the illustration. After practicing this skill they were given a blank pumpkin booklet and had to illustrate and write their own Halloween stories. The kids enjoyed being author's and we plan to do this assessment each month. The students also constructed their own volcano in science, using a quick setting dough. They painted the volcanos and then mixed baking soda and vinegar to watch their volcano erupt! The students enjoy doing hands on activities that connect to the world. For the month of November we will be use our creativity to make art masterpieces.

Report from Ms. Weekes Class (3-6)

The 3-6 grade class had a busy month of October. We made halloween decorations and decorated our room. We bought pumpkins from the hutterites and painted. We did the experiment "Inflating Balloons", and learned that mixing vinegar and baking soda makes carbon dioxide. Ms McKay and Ms Cobell came out and organized the Color Fun Run for us and it was a blast. Deputy Morales came out and talked with the students about being drug free. Afterwards, he passed out badges and candy to the kids. We had our Halloween Carnival on the 30th. All the kids were dressed up and pretty scary. Last but not least, we had 3 students in our class with perfect attendance for the first quarter.

We hope that you have a great November!! Until next time....
