**Re: iTunes U Course Development**

A core group of Educators at Coppell High School have been involved with the development and integration of iTunes U courses over the 2012-13 school year. We would like these Educators to review and provide an interactive update to the CISD Board of Trustees of that progress in order for you to see the power of mobile content creation in the learning process.

**Recommendation: That the following item is placed on the April 8, 2013 special board meeting agenda as a report item.**
