### **Introduction**

This next phase of interactive flat panel installation will equip ten teaching classrooms at River Trails Middle School and five teaching classrooms at Prairie Trails with wall-mounted 75” interactive flat panels.

### **Recommendation**

The administration recommends purchasing Clear Touch panels including required software and accessories from AVI Systems at a total cost of \$65,330.00.

The per unit cost from the Indian Grove Clear Touch project winning quote, approved at the February 11 Board meeting, has remained the same for these additional panels. The pricing from AVI is still the lowest quote. Below you will find a table summarizing the vendors and their quotes.

### **Background**

This purchase supports the district’s plan to expand our interactive flat panel integration across all four schools. After installing the five panels at Prairie Trails, that school will have completed its interactive flat panel integration. After installing ten panels at River Trails Middle School, that school will have completed approximately 25% of its interactive flat panel integration.

### **Financial Impact**

The RTMS quote recommended below is included in FY25 Technology budget, and the PT quote recommended below is included in the FY26 Technology budget.
