

**PRINCETON**

PRIMARY SCHOOL

**Susan Bartholomus**  
Art Specialist

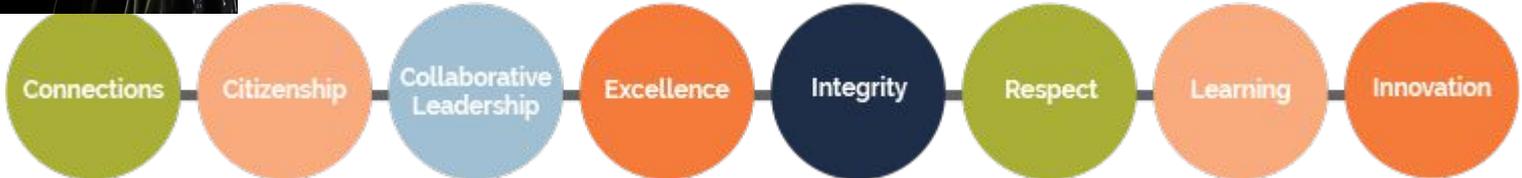

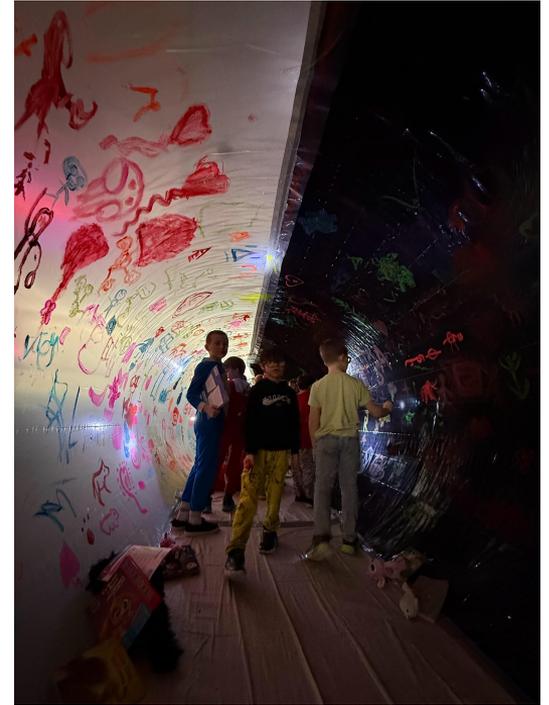

**Shannon Bruskwicz**  
Principal

March 3, 2026

Science and Art- Science and Art did some combined teaching for this project. Mr. Ostroot taught 1st and 2nd graders in Science about some pictographs on cliffs up north along the river. He showed a Native American man speaking about it and what the symbols meant. Students then needed to make their own pictographs on "animal skin" which was a special paper.

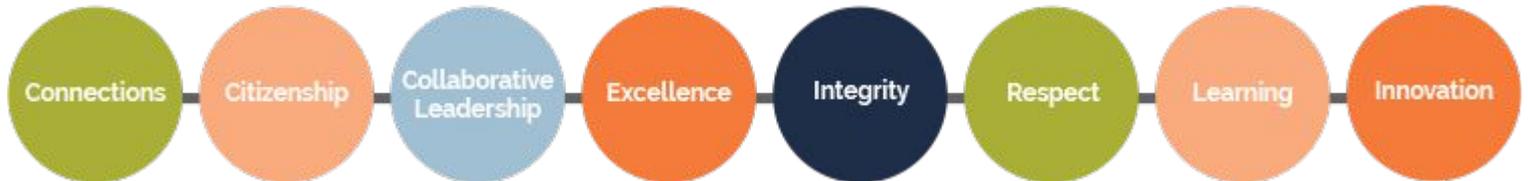

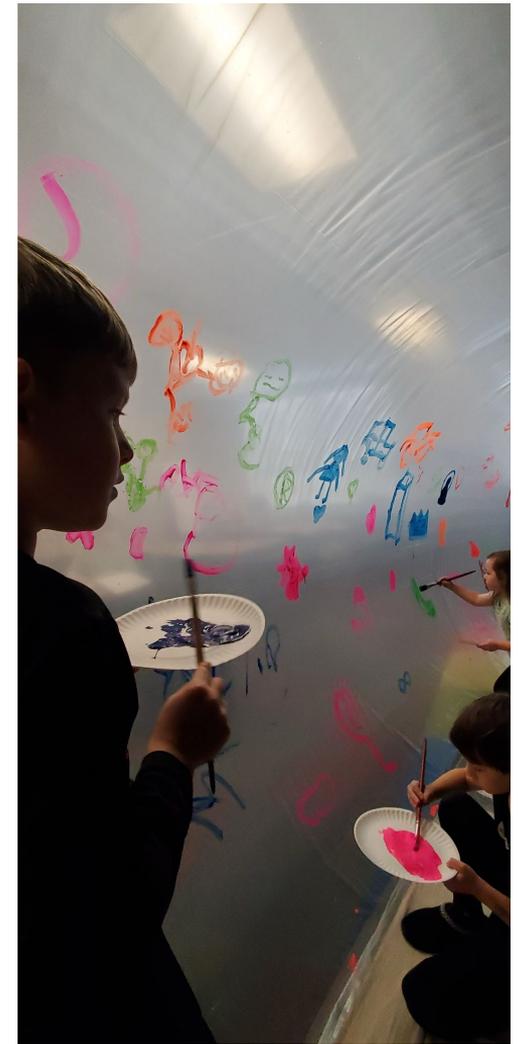

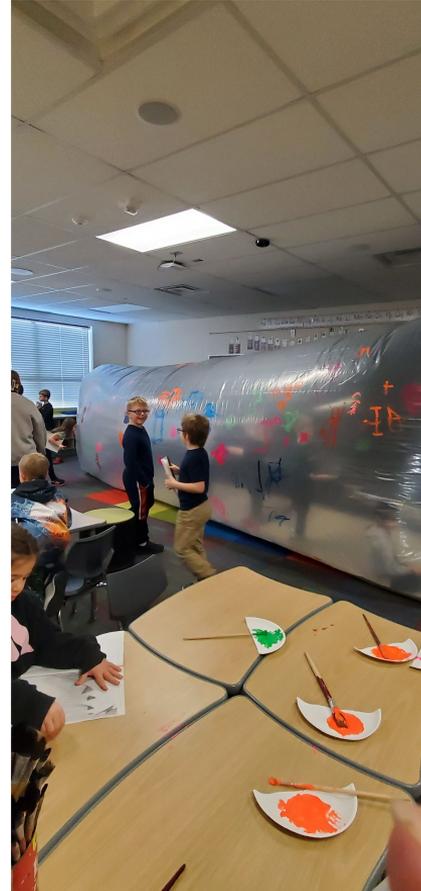

## Video 1

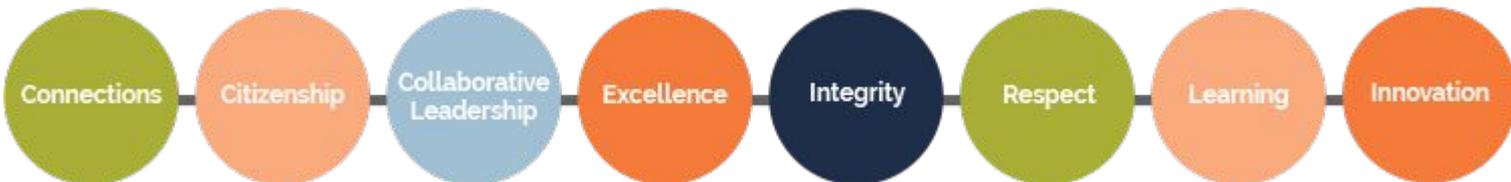

Second graders learn about hieroglyphics and cave art. Students paint inside the cave and other classrooms will visit the cave when it is finished and set up.
