

## Preschool

### **Background:**

Peggy Nielsen, a preschool teacher at Jacobson, started the year with a program that looked different from the past. Because of numbers and other factors, it was recommended and the board approved two 3-year-old classes (not one) for 20 students (not 14). These students have been engaged in early learning two times per week. When Peggy noticed her students growing and in need of enhanced services, she approached administration and requested another day be added to the schedule of any preschooler interested and able to attend. We are grateful for Peggy and other teachers for their ongoing dedication and support of students and families.

### **Recommendation:**

I recommend that the approves to add another day of Preschool open to any preschooler interested and able to attend.
