

State Assessment Longitudinal Results-2015

State assessment results are computed based on students enrolled May 1st who have attended a full academic year (50.1% of days). This past year, the Oregon Department of Education began assessing student outcomes with the Smarter Balanced Assessment. Oregon students in grades 5,8, and 11 were tested in OAKS in 2015 in Science, and assessed using Smarter Balanced in Reading/Lit and Math in grades 3-8, and 11. These tables are to give longitudinal perspective of the outcomes from the previous assessment (OAKS) and give the current results (2015) of the Smarter Balanced Assessment.

The OAKS and SBAC measure two different sets of standards and the results should not be compared as equals. The Smarter Balanced Assessment measures college and career readiness. These tests are one measure of student preparedness for post-secondary and give us data to make informed decisions on how to best support them through graduation. In Language Arts, the assessment measures both Reading and Writing, with Listening, Speaking, and Research also measured in grade 11.
