State ranking of local schools

The Michigan Department of Education has released a ranking of public schools based on student achievement data from 2007-09. The state used math and English scores on state assessment tests administered in the 2007-08 and 2008-09 school years in calculating the rankings. The number shown next to each school shows the percentile ranking compared to all public schools in the state; for instance, a percentile of 98 indicates that school performed better than 98 percent of Michigan schools. The complete list is at www.michigan.gov/mde-schoolranking.
