

### Curriculum and Instruction

We continue to work with building teams to get the necessary materials and trainings in place. The middle and high school had another training in the new math program that they will be piloting this year. I have sent our various webinars to the instructional coaches to share with staff.

### Professional Development

Building continue to provide trainings relevant to their needs. The trainings tend to pertain to much of the new programs that are going on. PD in DESSA and AIMSWEB still tend to be the focus of many of the buildings. Coaches have been meeting to help one another in the new programs. Our District math coach Mary Buck has been meeting virtually with all of the schools in either providing assistance with the K-5 math programs or the pilot programs 6-12. IEFA training from the state on unpacking the Essential Understandings have been attended by a few of our District staff.

### District Committees

The district committee lists have been approved and happen virtually. I have been ordering sample materials for social studies and science for the committees to review once these are in.

### Assessments

All assessments have been pushed back until our students are able to come in and test. The state has given us an extension. I have asked the building test coordinators to make sure that all ELL students have been entered into Infinite Campus. These will be pulled and added into AIM/WIDA for testing in December and January.

### Future plans

Our new committees will be meet as soon as we have the materials to start reviewing. They continue to trickle in from the various companies.
