

## Site Report – Chignik Bay – Feb, 2022

<b>To: Superintendent Kasie Luke and LPSD School Board Members</b>	<b>From: Stephanie Canning, Head Teacher</b>
<b>Outstanding Activities and Events</b>	
<p>Students will be working with the Lake Clark National Park Service to learn about volcanoes and animals that live in our ecosystems. They will also be working with the Adopt- a- Classroom program through Civil Air Patrol to participate in 3 stem/aerospace lessons and activities. Our 2 major cultural projects for the spring semester are in their beginning phases, both the smokehouse and Alutiq story book will be meaningful to the community and students. Students are excited by our STEM Fridays, where all levels work together on various STEM related activities such as the 3D printer, grow tower, school garden, vr system, circuit kits, coding, and drone usage. We also spend every Tuesday and Thursday participating in NYO activities during PE. Our student government is very excited to be hosting a date night for Valentine's day. More pictures to follow :)</p>	
<b>Personnel</b>	
<p>We were disappointed to see our tutor Chrystyna leave as she had a positive impact with our students, but we wish her well. The remaining staff members are working hard to support our students. We currently have an open aide position due to an employee resigning to care for family at home.</p>	
<b>Standards Based System/Curriculum Progress</b>	
<p>Most students are progressing well through their standards, and their MAP scores are an indication of this.</p>	
<b>Technology Progress</b>	
<p>Currently working with Lila to remove surplus (and extremely old) technology out of our storage room in order to make room for our library update.</p>	
<b>Facility Update</b>	
<p>We had a leak in the roof that was coming into the school, dripping on the carpet, however it seems our local maintenance man has been able to stop the leak for now. We did have a power outage on the 1st which required the use of the generator which seems to be running smoothly. Tim and Carl have discussed with our local maintenance man that they should be coming to the Bay soon to work on the boiler, since all parts have arrived on location.</p>	
<b>LSAC Activity</b>	

Following a LSAC meeting on February 8th, the LSAC decided to remove spring break in order to make up for 5 missed school days that were due to covid. Additionally, for the first time in months we have all seats filled in our LSAC.

### **Volunteer Report**

Our student government looks forward to putting on a Valentine's Day date night, free of charge, for our local community. They are also excited to begin a recycling program with Coastal Transportation. As we start getting into the beginning phases of our smokehouse, it's important to thank those who are contributing to the efforts of making this cultural project happen.

### **Professional Development**

I am in my spring semester of my Masters program, only one year left. Additionally, this semester I have started my courses for an Educational Leadership certification. Earthquake class was successfully completed and I look forward to bringing that information into the school. I hope to begin some professional development courses on mindfulness and math. Our new special education aide has begun his SPED training and hopes to complete literacy courses following that.

### **Pupil Attendance**

Students are attending school daily with no absences.

### **Student and Staff Safety**

N/A

### **Subsistence Calendar**

As noted above we have done away with spring break in order to make up for the school closure due to Covid.

### **Other**
