Students meet for 80-minutes daily. The curriculum focuses on Greek and Latin stems, grammar, analysis of literature, writing, and communication skills.

The Language Arts course provides students with an application to grammar and mechanics in writing and contextual use. Students are taught the structure of literary analysis. Word origins are reinforced. A collaborative environment is fostered to support classroom discussions and presentations.

The Literature course explores a variety of fiction and nonfiction texts. Elements of literature are analyzed in short stories and novels. Students are trained to navigate through informational texts to extract main ideas, vocabulary, and cross-curricular connections.
