## SEPTEMBER 2021 SCHOOL BOARD REPORT

### Pick up Patrol update

Family utilization as of 9/8/21

- 160 parents signed in and using it
- 20 parents registered and not using it as of yet
- 30 or so parents not using it at all

Things we have discovered about this program

- a few parents had issues registering-we were able to walk them through it
- a barrier for 2 parents was lack of internet access on phone or computer
- We have been receiving very positive feedback from parents about the program
- bus drivers now get an updated daily list of riders
- parents are also able to mark their students absent and explain why

### Patriots Day Program

Our Patriots Day program took place on Friday September 10th. We were honored to have local heroes in attendance. Our program showcased our Police Chief, Tamara Larson, our Boy Scouts and Girl Scouts, honored guests from the military, EMT/Fire, the American Legion, and essential workers. Students performed skits educating everyone on what it means to be an essential worker. Students had a parade of future heroes in dressed up costumes, they sang songs and gave thanks to those who have served and continue to serve our county and community. A special moment occurred when Isaiah Otto came as a guest singer to sing "Where were you when the world stopped turning" as we had played our family heroes presentation showcasing all of our students' family veterans and service workers.

### Start of a New School Year

It has been a wonderful start to the school year. We have been focusing on our students learning the routines of school and building relationships with their teachers and their classmates. Classes have been focusing on playing get to know you activities specifically in class with Mr. Christensen our new school counselor. He has made it his goal to be visible and accessible to all students. Here are some highlights from the first few days: students in 2nd grade made tie-dye class shirts to wear on fun event days, 3rd grade students have created engineering projects with bridges, 4th/5th grade students have started to do experiments on designing floating vessels out of tin foil that will hold 100 paper clips.

### Assessments

We have completed our baseline assessments in our new Math and English Language Arts curriculum. As we have been digging into the student data, we are finding that it gives us actionable information with a lesson designed to help fill in the missing standard of information for each student. Having this kind of concrete information will help us continue to grow in equitable practices within our RTI structure being able to deliver targeted research based instruction.
