Security Upgrades

Dear Crystal.

Thank you for looking into the services of Tyco Integrated Security. After our discussion and my survey of the facility, I am recommending the following system be installed. Tyco will upgrade the current Focus alarm controller and replace the control and both keypads with the Honeywell 250 alarm controller. Main change Rossville employees will see is that there will be a 4 digit user code compared to a 6 digit code.

Tyco will also upgrade the current access control system from a traditional server based system to a hosted system. Meaning the server will be replaced by Tyco hosting the access system. All the existing equipment will be used with Rossville managing the system through a website or App verse logging into the server. The hosted options have become more popular in recent years because schools don't have to maintain an out of date server. Plus the remote applications seem to work much better with the hosted option. Also included in this proposal is the addition of 50 proximity cards for the access control system.

Simplex Grinnell has also included two additional options for your consideration. The first is an annual fire alarm inspection. State of Illinois requires one annual fire alarm inspection of the fire alarm. Simplex Grinnell will leave an inspection report behind in a binder at the fire alarm panel. In case the state fire marshal ever does an inspection the report will be on site for him to view. The second option is a maintenance option that covers all normal wear and tear on equipment, service calls and trip charges. This option would cover all the small service issues encountered on the fire alarm, like the smoke beams needing cleaned. This would also eliminate the excessive service charges for time and material calls.

Focus Security Alarm Upgrade

1-   Honeywell 250 Fire Security Controller
2-   Keypads
3-   Vplex Modules
1-   Dual Line Dialer
•   Point of connection to existing equipment
•   Training on arming and disarming new system

Install Charge	$	0.00
Annual Monitoring and Maintenance (Existing Charge)	$	1,291.76

Access Control Upgrade

50-   Kantech Proximity Cards
•   Tyco to convert the existing traditional system and database to hosted
•   Tyco to train users on new web based access system

Install Charge	$	911.18
Annual Hosted Charge	$	400.00

If there are any questions, please feel free to call me at 217-304-1994. I will forward over riders for signing once approval is received.

Sincerely,

Jamison Kuemmerle
