Dropout Rate Reduction Program

Dr. Fred Hill
Assistant Superintendent

In an effort to minimize and/or lower the dropout rate, several program options are utilized by school systems to assist in this effort. I have included three high school program options for which I am seeking support from the Board of Trustees and Dr. Shaver. In each program, exploratory committees will be formed and will include administrators, teachers, and other pertinent staff members. Further reports and updates will be provided throughout the exploratory process.
