2. General Education Provisions Act (GEPA) Section 427 *

Section 427 of GEPA (20 U.S.C. 1228a) affects all applicants submitting proposals under this program. This section requires each applicant to include in its proposal a description of the steps the applicant proposes to take to ensure equitable access to, and participate in, its federally assisted program for students, teachers, and other program beneficiaries with special needs.

This provision allows applicants discretion in developing the required description. The statute highlights six types of barriers that can impede equitable access or participation: gender, race, national origin, color, disability, or age. The applicant should determine whether these or other barriers may prevent students, teachers, etc. from such access to, or participation in, the federally funded project or activity. The description of steps to be taken to overcome these barriers need not be lengthy; the school district may provide a clear and succinct description of how it plans to address those barriers that are applicable to its circumstances. In addition, the information may be provided in a single narration, or, if appropriate, may be discussed in connection with related topics in the application.

Section 427 is not intended to duplicate the requirements of the civil rights statutes, but rather to ensure that, in designing their programs, applicants for federal funds address equity concerns that may affect the ability of certain beneficiaries to fully participate in the program and to achieve high standards. Consistent with requirements and its approved proposal, an applicant may use the federal funds awarded to it to eliminate barriers it identifies.

Describe the steps that will be taken to overcome barriers to equitable program participation of students, teachers, and other beneficiaries with special needs.

([count] of 2500 maximum characters used) District 96 strives to ensure equity and equal access to programming for all stakeholders. For students: the district strives to place students in the least restrictive environment with the necessary supports and accommodations, enabling them to access the appropriate educational programming available to all students. District 96 also strives to provide opportunities for all students to engage in extracurricular activities. For staff members and other stakeholders: District 96 maintains a teacher leadership team, staff and community wellness committees, a professional development team of administrators and staff members, and a social-emotional committee that problem-solves and proactively identifies necessary supports for all to be successful in the school environment.

3. Bilingual Program Director Assurance

Please take note of the following, which is determined by your district's English Learner (EL) count, shown below:

District 96 will examine all programs to be sure that our state and local resources continue to fund our core programming needs equitably across our schools. The Title I federal resources will supplement programming for our at-risk subgroup populations, addressing specific needs that the District's core programming does not address. These activities and/or resources might include additional staff dedicated to the instruction of students in our subgroups or supplemental resources that address the differentiated developmental needs of students in our subgroups. Title II federal resources will supplement staff training and development related to core initiatives beyond the primary budgeted allocations that would otherwise not be able to be supported. Examples of areas for supplementing include training and support in the instructional delivery of core academic content to improve student learning and maintain consistency and alignment with standards. It might also include training and support in social-emotional learning and creating a positive school culture and climate as the District's umbrella for supporting whole-child development. Training in technology integration is also a focus, as the District strives to promote the technological skills of all our learners. Title III federal funds will provide additional resources for English Learners' instruction, staff professional learning, and family engagement for our English Learner population. These additional resources might include presenters for Bilingual Parent Advisory Committee meetings or professional learning about best instructional practices for educators of English Learners. Title IV federal funds may enhance training and support for staff in health and wellness/creating a positive school culture and climate. Title IV funds will also strengthen the core curricular health and wellness content by providing student programming from outside vendors who will provide hands-on experiences and applications to real-life situations. IDEA Part B funds will be put towards purchased services through the LADSE Cooperative for staff professional development and purchased services for professional development through the District. IDEA funds might also pay for purchased services, evaluations, therapies, and instructional supplies materials. Funds may also assist with the costs of related service staff allocations to help ensure services are determined by proportionate share expenses. The IDEA Preschool funds will be used for purchased services through the LADSE Cooperative for early childhood evaluations and coordinator services, instructional materials and supplies, and proportionate share.

District 96 continues to use various resources to determine our district's needs. We have examined our academic, social-emotional, and extra-curricular programming to identify gaps in meeting our students' needs. We used local and state-wide assessment data, surveys (staff, family, and student), meetings with school and district leadership team members, and meetings with parents to determine what needs we should continue or discontinue addressing and what additional needs we should consider adding to our list. In addition, we reviewed our professional development survey evaluations to determine what professional learning our staff needs to ensure we meet our students' academic, social-emotional, and extra-curricular needs. For special education, a parent needs assessment and satisfaction survey, and a staff professional development needs assessment survey

were completed in the Spring of 2025 to plan for the use of funds for professional development in the 25-26 school year.

i. Identify areas of need related to student achievement, subgroup performance, and resource inequities.

ii. Include any additional information relevant to this planning document. Provide targeted responses where noted.

iii. Describe how the needs assessment information will be used for identifying program goals and planning grant activities for each program as applicable.

A. Title I, Part A - Improving Basic Programs

Also identify needs assessment results, including programs and activities planned as a result of the needs assessment, a description of strategies for closing any achievement gaps, and key professional development opportunities for teachers and principals.

Our district has identified several areas of need through a comprehensive analysis of student performance data, including state assessments, local benchmark assessments (e.g., MAP, FastBridge, iReady Diagnostic, IXL, and ALEKS), and subgroup disaggregation. Achievement inequities persist among students with IEPs, English learners, and low-income students, particularly in reading fluency, foundational literacy skills, comprehension, mathematical computation, and mathematical reasoning. Additionally, resource inequities exist between math interventions and literacy interventions.

To address these needs, our district implements a variety of tiered intervention programs tailored to students' skill levels. In reading, we utilize Leveled Literacy Intervention (LLI), Soar to Success, SRA Corrective Reading, Reading Mastery, Wilson Fundations, UFLI, Read Live, and Explode the Code. These programs are strategically selected based on individual student assessment data to target specific deficits in fluency, phonemic awareness, and comprehension. In mathematics, we provide supports aligned with our core programs, iReady and Carnegie Learning, and supplement them with resources such as Number Worlds, Voyager Sopris, Connecting Math Concepts, and a direct instruction math approach based on placement assessments. Targeted computer-based instruction further supports skill development.

Gifted students receive project-based instruction in ELA and compacted, accelerated math curricula, with daily instruction at a level above their grade placement. These enrichment opportunities help ensure all students are appropriately challenged.

The results of our needs assessment directly inform our program goals and grant-funded activities. For example, grant funds will support the purchase of updated intervention materials and professional development. Staff receive ongoing training on the effective implementation of intervention programs, data analysis, and differentiated instruction to ensure fidelity and impact. Principals participate in instructional leadership development to support data-informed decision-making and equitable resource allocation.

Through this comprehensive approach, we aim to close achievement gaps, improve subgroup performance, and ensure all students have equitable access to high-quality instruction and support.

B. Title I, Part A - School Improvement Part 1003

C. Title I, Part D - Delinquent

D. Title I, Part D - Neglected

E. Title I, Part D - State Neglected/Delinquent

F. Title II, Part A - Preparing, Training, and Recruiting

Also identify needs assessment results, including programs and activities planned as a result of the needs assessment, a description of strategies for closing any achievement gaps, and key professional development opportunities for teachers and principals.

As a district, we continue to prioritize closing achievement gaps and fostering a positive, inclusive school culture. Through our analysis of achievement data (including IAR, MAP, and local assessments), professional development feedback surveys, and insights from the All-District Leadership Team, we have identified persistent performance gaps among students with IEPs, multilingual learners, and students from low-income households. These subgroups consistently perform below district averages in both ELA and mathematics, indicating a need for differentiated instructional strategies and equitable access to high-quality supports.

Our needs assessment also revealed the importance of strengthening staff capacity to meet the academic and social-emotional needs of all learners. In particular, we recognize that consistent implementation of Universal Design for Learning (UDL), small-group instruction, and Culturally Responsive Teaching Practices is essential to support diverse student populations. Additionally, we have identified disparities in access to social-emotional learning (SEL) supports and culturally responsive discipline strategies across schools.

To address these needs, our district will continue to invest in professional learning focused on UDL principles, small-group differentiated instruction, and culturally responsive pedagogy. We will also expand training in Restorative Justice practices and equity-centered climate strategies to foster inclusive, student-centered learning environments. These initiatives are directly informed by our needs assessment and will be supported through grant-funded activities such as targeted PD, instructional coaching, and the purchase of supplemental SEL and intervention materials.

By aligning our strategies with the identified needs, we aim to improve subgroup performance, close achievement gaps, and promote equity across all schools.

G. Title III - LIEP

The district hosts a Bilingual Parent Advisory Committee (BPAC) composed of parents, teachers, and administrators, which plays a vital role in identifying and addressing the needs of our English Learner (EL) students and their families. Regular committee meetings provide a forum for discussing what instructional strategies and supports have been effective, where challenges remain, and what improvements can be made. Through these meetings, along with a review of student performance data, we have identified that EL students benefit from increased small-group instruction, individualized software programs, instructional field trips, and summer enrichment opportunities that support academic language acquisition.

Our needs assessment also revealed gaps in two-way communication between schools and EL families. Parents expressed a need for clearer communication and more support navigating the school system and external community resources. As a result, the district will continue to prioritize the expansion of the parent liaison coordinator role to bridge communication and access gaps, addressing a key area of resource inequity.

Based on these findings, our district plans to allocate grant funds to support targeted professional development for teachers on best practices for English Learner instruction, including strategies for scaffolding academic language, culturally responsive pedagogy, and integrating language objectives into content instruction. Principals will also receive training on how to support these practices within their buildings. Additionally, we will increase access to learning opportunities beyond the classroom-such as curriculum-aligned field trips and enrichment programs-to reinforce language acquisition in authentic, real-world contexts.

These efforts are aligned with our broader goals of improving subgroup performance, increasing equity in access to services and learning opportunities, and fostering stronger partnerships with our EL families.

H. Title III - ISEP

I. Title IV, Part A - Student Support and Academic Enrichment

Also provide information for Title IV-A programs and activities planned as a result of needs assessment that align with the Title IV-A budget.

In addition to the information provided in Title II, Part A regarding social-emotional learning and school climate, our district will use Title IV funds to expand programming and services that support the overall health and well-being of our students. Our needs assessment, which includes disciplinary data, behavioral referrals, and input from social workers and student focus groups, indicates a growing need to help students develop healthy interpersonal relationships and responsible digital behavior. Increased incidents of cyberbullying, inappropriate text messaging, and social media conflict have negatively affected school climate and student engagement.

In response, the district has begun to implement core supports, including student leadership opportunities and affinity groups such as the Gender Safe Alliance. Title IV funds will allow us to expand these efforts by bringing in community partners to lead workshops on healthy relationships, digital citizenship, and identity development. We will also implement additional instructional programming and assemblies focused on positive social behavior and inclusivity.

Professional development for staff will be a key part of this work. We will provide training in restorative practices, trauma-informed care, and strategies for creating identity-affirming learning environments. These efforts aim to promote positive behavior, strengthen school connectedness, and ultimately remove barriers to academic success and engagement for all students, especially those most at risk.

The Special Education Leadership Team (SPELT) consists of special education teacher representatives and related service reps from each discipline of related service. SPELT meets monthly from September to May. They assist in collecting data from their schools and associated service groups to determine needs in professional development, alternate curriculum, and instructional supplies and materials to meet student needs. In March of 2025, a survey was sent to parents of students with IEPs and all District 96 staff. LADSE developed the survey for D96 to send to families and staff. Proportionate share funds are determined through Timely and Meaningful Consultation for FY25, which took place on Monday, April 29, 2025.

L. IDEA, Part B - Preschool

The Special Education Director meets with the Early Childhood special education team monthly to determine professional development and instructional materials required to meet student needs. Monthly meetings with the LADSE cooperative are scheduled and consistently monitored to determine purchased service needs. In addition, data from ISBE is monitored monthly to assess programming needs for new students coming to the district from Early Intervention services. A meeting was scheduled on September 25, 2024, with area preschool directors to share information about preschool screening and child find for preschool children. Preschool students' concerns and needs were also discussed at the meeting. Invitations to this meeting were sent on September 5, 2023. Proportionate share funds are determined through Timely and Meaningful Consultation, which took place on Monday, April 29, 2025.

Through various committee structures and surveys, the LEA gathered input from multiple stakeholders around the development of our Consolidated Plan. Throughout this past school year, the LEA met with the MTSS committee, a group of teachers, specialists, administrators, and student support personnel. On April 30, 2025, the LEA, who also serves as the Bilingual Director, communicated with our district Bilingual Parent Advisory Committee (BPAC) and our Title I families to inquire about input/feedback on proposed programming recommendations. The District Parent Leadership Team and the All-District Leadership Team also provided regular feedback to help inform our planning related to program initiatives and student supports. We plan to allocate all Title I funds to support intervention, focusing on identification and support in the earlier grades. Based on the low-income population, schools identified for targeted assistance would be Ames Elementary School and Hauser Junior High School. Title II, III, and IV funds will support staff and students across all grades, kindergarten through eighth.

Response from the prior year Consolidated District Plan.

Through various committee structures and surveys, the LEA gathered input from multiple stakeholders around the development of our Consolidated Plan. Throughout this past school year, the LEA met with the MTSS committee, a group of teachers, specialists, administrators, and student support personnel. On May 13, 2024, the LEA, who also serves as the Bilingual Director, communicated with our district Bilingual Parent Advisory Committee (BPAC) and our Title I families to inquire about input/feedback on proposed programming recommendations. The District Parent Leadership Team and the All-District Leadership Team also provided regular feedback to help inform our planning related to program initiatives and student supports. The District convenes meetings and distributes surveys to solicit input from parents whose children participate in the various support programs offered, including, but not limited to, interventions, gifted and talented, social-emotional support, English Learners, and special education. We also solicit input from our parents and offer parent information nights to help parents engage with the learning process at home. Parent information nights have included addressing parental support with educational programming, managing student anxiety, and addressing student social conflicts. Parents at these information nights and parents on our Parent Leadership Team are asked questions such as, Are there any topics related to supporting your child at home that you would like to see addressed? Do you understand how your child was identified to receive support services? Do you receive periodic updates regarding your child's progress toward their academic goals? Are you aware of volunteer opportunities in your child's school? What topics interest you in supporting your child's schooling experience? Do you have any additional suggestions for how we might help you partner with us to support your child's educational experience?

District 96 is committed to continuing to engage stakeholders. We will continue to engage families through family meetings for our parents whose students are served by our English Learners program, our intervention services, and our gifted and talented services. We also dedicate funds to a parent liaison for our families in our English Learners program to ensure a bilingual district contact, as most families in our English Learners program speak Spanish in the home. In addition, we will continue providing parent information sessions and learning nights to foster the home-school connection. Furthermore, with the start of SY26, we will begin the fifth year of our five-year strategic plan, in which one of our overarching goals is increasing family and community engagement. Increasing family engagement is one of our SMART goals related to the plan.

Our early childhood program provides preschool screening throughout the year to preschool-age students to determine supports and services that may be necessary before the start of the kindergarten year. In addition, we schedule annual transition meetings from Early Childhood to Kindergarten, where the receiving school team participates with a team consisting of the kindergarten teacher, interventionists, social worker, and principal. The district also administers a summer screening assessment to assess readiness and identify at-risk kindergarten students before the start of the year so that accommodations can be implemented at the beginning of the year.

According to our district's Multi-Tiered Systems, students who do not meet grade-level standards on our benchmark assessments (i.e., FastBridge, NWEA MAP, and i-Ready Math Diagnostic Assessments) are served in our Tiered Supports (MTSS) program. Students who are moderately below grade-level standards receive 90-150 minutes of English/Language Arts or mathematics interventions per week. Students significantly below grade-level standards receive 150-300 minutes of English/Language Arts or Mathematics interventions per week. These interventions are designed to support students' deficits in these academic areas and are provided by classroom teachers, reading specialists, and mathematics interventionists. Students identified as advanced through our advanced placement process receive services beginning in fourth grade. Students in this program receive a full hour of math services five days a week in grade four, and students in grade five receive a compacted accelerated daily math program. In reading, students in grades three through five who are identified as advanced receive three hours per week of pull-out services. The middle school offers an advanced ELA and an advanced math course for students in grades six through eight who are identified as advanced. In addition, our program meets the needs of students with social-emotional challenges, identified through a social-emotional screener, that may interfere with academic success, as we offer interventions through social skills groups delivered by qualified social workers. We also utilize a social-emotional curricular resource to provide services to all students at the Tier 1 level.

We have a defined Multi-Tiered Systems and Supports (MTSS) process that reviews benchmark data three times a year to determine students' levels of need. We also progress monitor all students receiving interventions and review the data from the progress monitoring every six weeks to determine if services have 1) been effective in bringing students to grade level and should be decreased, 2) have been effective but need to be continued, or 3) services have not been effective and need to be changed to better meet the student's needs. All students, including low-income, EL, special education, neglected, and delinquent, are universally screened in the Fall, Winter, and Spring. We use a variety of screening tools to assess students' needs. These assessments assess students in various areas, including but not limited to reading fluency, reading comprehension, early literacy measures for kindergarten and first-grade students, early numeracy measures for kindergarten and first-grade students, and computational grades. In addition, we administer a social-emotional screener to all students to identify social-emotional qualities that may need to be addressed. We also administer a cognitive screening measure to students in grades three and five. Students who are English learners are also assessed using the ACCESS assessment to determine the level of English services needed and any needed interventions.

We have reading specialists and math interventionists to deliver interventions to students in English/Language Arts and mathematics. These interventions are delivered through a pull-out service to provide small-group instruction or through in-class support at the elementary level. The intervention minutes are determined by the needed levels of support based on our Multi-Tiered Systems and Supports (MTSS) process. They can range anywhere from 90-150 minutes for students who are moderately below grade-level standards to 150-300 minutes for students significantly below grade-level standards. In middle school, certified specialists work with students below grade-level standards, with students moderately below standards receiving a push-in and/or pull-out support model. Students significantly below standards receive an additional 40-minute reading and/or math intervention. In high school, reading specialists, who employ three certified staff members to deliver enrichment at the elementary level. In addition, our middle school teachers staff our accelerated programs for students in grades six through eight. English learners are provided language support by a certified bilingual or EL-endorsed teacher, usually through a pull-out model; however, EL students might also receive push-in services when deemed appropriate.

Interventions are designed to meet the individual needs of students. We use foundation skills programs, fluency programs, decodable instructional texts, and comprehension models to support student learning in reading. We utilize various resources customized to the needs of the students; these programs include but are not limited to Soar to Success, Wilson Foundations, Read Live, Levelled Text, Lexia, and Voyager Sopris Language. In mathematics, we utilize intervention materials and transition guides for previous grade levels from our core mathematics programs, Ready Classroom Mathematics and Carnegie Learning. We also use skill-based intervention programs such as Bridges in Mathematics, Math in a Minute, and Math Fluency. Supplemental to the core mathematics instruction, practice, and assessment in isolated mathematics skills; programmatic placement tests determine the needed skills. We also offer a direct instruction mathematics approach that is supplemental to the core mathematics instruction. Students who are struggling in mathematics are provided with additional support in mathematics. In science, we use the Science Curriculum Framework for Mathematics and Science, which is aligned with the core experience at the elementary school. Accelerated classes are provided at the middle school and include daily instruction at a grade level above the student's current grade level. English learners are provided support with the programs listed above by certified bilingual or EL-endorsed teachers. Students with identified social-emotional needs receive service minutes with our school-based social workers.

We disaggregate our data by various demographics relevant to our population, including but not limited to race/ethnicity, socio-economic status, and gender. We also disaggregate our data by school and classroom teachers to ensure students receive similar educational experiences across the school district. We will continue to use progress monitoring data, benchmarking data, and state assessments to examine students' performances in these subgroups, as well as the performances of students by teacher and by school. Using our data management system, we can pull data by classroom, examine growth over a school year, and aggregate longitudinal data to look for patterns.

 We have both library/media center informational specialists and instructional technology staff collaborate to provide a robust program in research and digital literacy elements. The elementary librarians offer various projects to explore interesting topics through print and digital research. Our instructional technology team supports classroom teachers in carrying out instruction that embeds digital literacy into learning. Our core programs offer print and digital components that expose students to a robust program. Our resources across disciplines provide various media and genres for exploring literacy, including print and online resources. The middle school librarian partners with all disciplines to identify supplementary resources that will personalize and enhance the learning experience for students. We also have a strong partnership with our community libraries, and they support a summer library program for our summer school program.

 The district has a defined screening process, including cognitive ability screening tools and achievement measures for identifying students. The formal identification process begins at the conclusion of third grade; however, parents can request the process before third grade. Once students are identified, they receive services through pull-out small group models or participation in an accelerated course of study. Students in grades four and five can receive enrichment in English/Language Arts for three hours a week. Students in grades four and five also have the opportunity to receive enrichment in mathematics with a pull-out replacement math program. To support effective transitions from middle school to high school, our district uses a data-driven approach grounded in our Multi-Tiered Systems of Support (MTSS) framework. In eighth grade, student performance data, including assessment results and teacher input, is reviewed to inform placement recommendations. Our eighth-grade teachers collaborate with high school counseling staff to ensure that placement decisions reflect each student's full academic potential, even when assessment data may not capture their abilities.

We offer double acceleration opportunities in mathematics, and qualifying eighth-grade students may enroll in a high school-level math course.

Our district partners with the two other elementary districts that feed into the high school to ensure a vertically aligned academic and career exploration framework for grades 6-12. This partnership includes coordination with the high school to develop clear pathways for students to engage in career development activities.

Response from the approved prior year Consolidated District Plan.

In the transition from elementary to middle school, the data from the Multi-Tiered Systems and Supports (MTSS) process supports middle school placement recommendations. All students are assessed at the end of the fifth-grade year in preparation for transitioning to middle school. The data from the end of fifth grade is utilized to make class assignment recommendations. All students are eligible to be considered for support or enrichment as a part of the transition process. Students can also take a transition class to familiarize themselves with the middle school model. Our middle school team regularly consults with their counterparts at the high school. We also schedule administrator articulation meetings three times per year between our district and the high school district we feed into. At the end of the year, our eighth-grade team of teachers visits the high school to discuss the placement of individual students whose assessment scores may not reflect their true learning potential. We provide opportunities for double acceleration in mathematics and offer a high school level course for eighth-grade students who qualify for the program.

2. If applicable, describe the district's support for programs that coordinate and integrate the following:* [2]

Academic and career and technical education content through coordinated instructional strategies, that may incorporate experimental learning opportunities and promote skills attainment important to in-demand occupations or industries in the State; and work-based learning opportunities that provide students in-depth integration with industry professionals and, if appropriate, academic credit.

District 96 continues to engage in promoting a culture of inclusivity. The middle school staff partners with Facing History and Ourselves to engage in staff training to get to know students, cultural competency, and restorative justice. The administrative team is committed to problem-solving and imposing consequences that do not disrupt the learning process. The district tracks discipline data and analyzes it by subgroup to ensure no disparity or inequity in how the schools respond to students. District 96 is proactive with social-emotional learning, discipline, and inclusion. All schools have focused on social-emotional lessons on bullying, reporting bullying behaviors, and the role of the bystander. We also have an anonymous online bullying reporting system, which allows individuals to report incidents of concern. The school-level team will respond and follow up with the concerns to determine the necessary intervention and/or support needed to remedy the situation. As a district, we are implementing a restorative justice model to work on the underlying causes of a perpetrator's behavior and determine how best to address those needs to change the behaviors. We track discipline data to ensure we are attending to patterns of inequity in response to students based on race, ethnicity, socio-economic status, English proficiency, immigrant status, disabilities, and/or gender. We also implement programs to raise parent and staff awareness around these issues, including the use of outside agencies like Sarah's Inn to address the social-emotional health of adolescents in the middle school and implementing units of instruction from Facing History and Ourselves to address issues of equity and bias in decisions made by both students and adults in our system.

Ames Elementary School and Hauser Junior High School are identified for targeted assistance based on their percentage of low-income students. The goal of the targeted assistance program is to support the identified at-risk students in meeting expected growth targets as determined by individual goal setting and progress monitoring based on their universal screening results. Multiple measures will be used to track the growth of these students and may include, but are not limited to, standardized reading fluency, comprehension, early literacy and numeracy measures, computation measures, NWEA MAP data, and common unit assessments. In addition, students will receive intensive, targeted instruction delivered by reading and/or math specialists based on the identified gaps in their skills/learning outcomes. The grant will support additional personnel to assist in providing the targeted interventions.

We have a systemic approach to identifying target populations through our Multi-tiered System and Supports (MTSS) process. School teams meet once universal benchmark data is collected to review the data. The team consists of classroom teachers, an English Language Learner teacher, a special education teacher, a gifted teacher, the school psychologist, the school social worker, the principal, and, when appropriate, paraprofessionals. The physical education, music, or art teacher may sometimes participate if the child has a particular strength in this area that can support the student's growth. Nurses also participate if the student has a medical condition that may impact learning. The team analyzes each student's data and determines how best to meet their instructional needs. If it is determined that the child would benefit from additional support, the parent is invited to a meeting with the team to discuss the proposed plan developed to meet the student's needs. At that time, additional input from the parents is welcomed to assist in designing an appropriate plan. The team reviews the student performance every six weeks, and individual programs for students are flexibly adjusted if needed after each six-week check-in.

BACKGROUND

Section 6312(5)(B) of ESEA of 1965 as Amended by ESSA requires that the local educational agency (LEA) collaborate with the state or local child welfare agency to develop and implement clear written procedures governing how transportation to maintain students who are Youth in Care in the school of origin when in their best interests will be provided, arranged, and funded for the duration of the time as Youth in Care.

DEFINITION AND REFERENCES

First Division vehicles are defined in the Illinois Vehicle Code as motor vehicles designed to carry no more than 10 persons total.

First Division vehicles can be used to transport 10 or fewer persons, including the driver, on regular routes for any and all school-sponsored activities, including curriculum-related trips. Examples of First Division vehicles include cars, station wagons, mini-vans (10 passengers or less which includes the driver), taxi cabs, medical carrier or medi-car, and Suburbans. The manufacturer sticker (Federal Certification Label) located on the inside of the driver's side door will stipulate MPV for Multi-Passenger Vehicle, MPPV (MultiPurpose Passenger Vehicle), or Passenger Car [49 CFR 571.3]

 - ii) Specifying the actions that will be taken against employees for violations of such prohibition.

- f) Assisting employees in selecting a course of action in the event drug counseling, treatment, and rehabilitation are required and indicating that a trained referral team is in place.
- g) Making a good faith effort to continue to maintain a drug-free workplace through implementation of the Drug-Free Workplace Act.

31. The applicant represents and warrants that all of the certifications and assurances set forth herein, in the application, all attachments, and the Grant Agreement are and shall remain true and correct through the Term of the grant. During the Term of the grant, the award recipient shall provide the Illinois State Board of Education with notice of any change in circumstances affecting the certifications and assurances within ten (10) calendar days of the change. Failure to maintain all certifications and assurances or provide the required notice will result in the Illinois State Board of Education withholding future project funding until the award recipient provides documentation evidencing that the award recipient has returned to compliance with this provision, as determined by the Illinois State Board of Education.
