State set estimated SBA scores for the spring 2020 year based on prior state assessment scores, Kindergarten Entrance Inventory (GR4 only), attendance, behavior, mobility, special education status, retention and demographic data. Target scores were set based on the predicted spring 2020 scale scores. CSDE maintains these estimates include a measure of uncertainty and should not be used to support any high-stakes decisions. The model used to predict Grade 4 has the highest degree of uncertainty, since no prior SBA score was factored in.
