2024

37% of students were proficient (Level 3/4) compared to 38% statewide.

2025

34% of students were proficient (Level 3/4) compared to 38% statewide.

School Value Growth

Growth is determined from each individual student's growth trend line. A score above that trend line would indicate positive growth, while a score below that trend line would indicate negative growth.

It is possible for students to have growth, but indicate a negative growth score.
