Maintenance Report 04.25.23

Maintenance is steadily keeping us busy. In the back of the High School, we brought in 3 loads of shot rock and a load of D1 to build a pad for the 40' container holding the Bio. Mass boiler. Thursday the 20th AP&T used their 50-ton crane to lift and place the container.

Earlier this month Ketchikan Mechanical came over to inspect the district sprinkler systems in all three school and recertified each of the systems. This is done annually every year.

Johnson Control came down from Anchorage this month for continued training on the high schools HVAC hardware and software systems. There are still a few items in the school that are being worked on to allow the system to run smoothly.

Wednesday the 19th we had state bus inspections. Brent O'Conner, our new Maintenance/Bus driver, returned from his CDL and bus endorsement training class. He will be trained on the Hollis bus route and then will be taking over that route. We are looking forward to the extra help the routes and district maintenance.

This is also the time for planning and preparing for the districts summer maintenance. We are looking forward to a great summer and accomplishing a great deal.

If there are any question regarding fleet and or district maintenance, please don't hesitate to ask.

Daniel Nelson
Maintenance Director
