UPDATES and TRENDS

Dyslexia will be added as an area of special education eligibility:

- Will take effect for the 2027-2028 school year
- Districts will be required to screen all students for dyslexia
- State approved two programs for screening students and fourteen for instruction
- NBAS will need to purchase and train teachers in one+ program(s) for instruction

Homeschooled students re-entering the district:

- No state regulation on grade enrollment/placement testing
- Can cause older students to be placed with younger students
- Increased SpEd referrals due to lack of instruction
- Some districts have a policy regarding the placement of students
