

Please find attached the concept art/layout for the three different signs we talked about.

We went with a 8' x 16' size for the larger sign out front, our reasoning is aesthetics, the 10' x 20' doesn't offer enough difference legibly to merit the difference in price.

The sign is all steel construction with diabond faces (PVC between two pieces of aluminum).

All copy and image is painted.

PRICE: \$7250.00. (Includes installation)

5' x 10' Sign is all steel with diabond face with vinyl copy (as we suggested).

PRICE: \$1975.00 installed.

4' x 8' Signs all steel, diabond faces, and vinyl copy.

PRICE:\$1570.00 installed.

TERMS: We require half down and balance net 30 days for school signage,

Individual signs are half down, balance upon delivery (prior to installation).

Please review the art and let us know what you think.

We appreciate the opportunity to work with you.

Kind Regards,

Bob/Anderson Graphics Inc.
