

Important Disclaimer

This Levy Calculation Form is a worksheet that allows the District to calculate and analyze the available levy and extension amounts and is prepared for informational purposes only. Reasonable efforts and generally accepted methods of calculation have been incorporated into the spreadsheets. However, PMA Securities, LLC takes no responsibility for the accuracy of the output and it is highly recommended that users verify calculations independently. The data input, projections, and assumptions provided in this form are based on the information provided by the District. PMA will not verify the accuracy of the data provided by the District and is not responsible for any inaccuracies or incompleteness that appears in the data provided in this form.

Furthermore, the Levy Calculation Form includes a copy of the Illinois State Board of Education Certificate of Tax Levy which is approved for use in 2006. PMA believes this Levy Calculation Form to be current, but the District should verify that with the Illinois State Board of Education.

PMA Levy Worksheet

Instructions

Please note that you need to start on the "Input" worksheet and then go to the "Calculations" worksheet and then finally print the "Certificate of Tax Levy and the Explanation" worksheet at the end.

INPUT worksheet

Start on this worksheet. Enter the information requested in the green boxes. The majority of the information can be found on your most recent tax extension from your county clerk(s). You will need to estimate your current EAV and new construction value (if you are tax capped). Make sure the totals at the bottom of the "Input" worksheet equal your most recent tax extension.

CALCULATIONS worksheet

You only have access to enter information in the green boxes. Use the Levy Amount \$ and/or Levy Increase % Input columns to adjust your levy, if needed. Typically, you would enter a number that is larger than the estimated extension column to make sure you capture all available funds. Any number entered in either of these columns will override and/or increase the estimated extension column.

Non-tax capped districts must enter a levy value for the Municipal Retirement, Social Security, and Tort funds in the Levy Amount \$ column.

Enter a dollar amount to be levied for SEDOL (Lake County only) and Bond & Interest in the appropriate box.

The Levy Amount column on the far right is what will carry over to the Certificate of Tax Levy worksheet.

If Capped, review the box labeled Levy Amount Below/Above Estimated Extension. This is your "cushion". This number should not be negative. If Non-Capped, all levy amounts should exceed estimated maximum extension.

Use the percentages at the bottom right for your truth in taxation notice, if applicable.

TAX CALCULATOR - Calculations

You only have access to enter information in the green boxes. This calculator is based off the data in the "Calculations" worksheet.

The calculator allows for debt service abatement scenarios to offset the operating increase. The worksheet will highlight if the abatement amount exceeds the actual debt service levy.

The calculator assumes the example home value increases by the overall reassessment rate. Variations in residential re-assessments, and between property classifications will cause an individual home's value to vary from the computed estimate.

EXTENSIONS worksheet

You only have access to enter information in the green boxes. If applicable, input the County Loss %.

For “what-if” scenario analysis, please input a percentage change in Existing EAV and a New Property amount to sensitivity test the proposed levy for variations in EAV assumptions. The “Extensions” worksheet will highlight in pink if you should consider changing the inputs on the “Calculations” worksheet to possibly prevent an under levy outcome.

When the actual data is received in the spring, insert the actual percentage change in EAV and the actual new property. If permitted by the county(ies), you may use cells L18-L28 to reallocate the extension between funds so long as the adjusted amounts do not exceed the levy for the fund.

Insert the actual Bond and Interest extension into cell I35 and the actual SEDOL extension (Lake County only) into cell I33.

TAX CALCULATOR - Extensions

You only have access to enter information in the green boxes. This calculator is based off the data in the “Extensions” worksheet.

This calculator allows the user to estimate the taxpayer impact for what-if scenarios for variations in EAV assumptions, and also the estimated impact based on the final extension information.

For “what-if” taxpayer impact calculations, insert the B&I levy (without loss cost or abatement) into cell I35 and the SEDOL levy (Lake County only) into cell I33 into the “Extensions” worksheet.

Note, once the actual Bond & Interest extension is known and input on the "Extension" tab in cell I35, no input is needed for the Loss Cost and Abatement cells.

The calculator assumes the example home value increases by the overall reassessment rate. Variations in residential re-assessments, and between property classifications will cause an individual home’s value to vary from the computed estimate.
