Board Report for December 2024 - Report aligned to 2024-25 Goals

- During November's professional development staff from kindergarten through 3rd grade, as well as special education staff, was trained in how to administer the AIMSweb assessments as mandated by Act 20. In addition, teams continued working with Paula Moore from CESA II on math essential standards, "I can" statements and some worked on identifying essential vocabulary.
- Our PBIS Committee has been very busy. The penny drive raised more than double what last year's penny drive raised. The committee also had members reteach bus expectations to our students on the school buses. Clarity of what is expected for recess clothing given the temperature outside was developed. They organized staff dress up days that include a mismatched shoe day, a drink out of anything but a cup, ugly sweater day, along with a school wide pajama day. The committee also determined when classroom Christmas parties and other related activities would take place during the week before Christmas break.
- On December 11th some district administrators and staff from both TCE and the middle school reviewed four math curriculum resource options as part of the math curriculum adoption process. The team will meet again on January 23rd. Representatives from two of the publishers will be presenting either in person or via Zoom to provide more insight into what each curriculum offers.

Respectfully submitted by Jerim DesJarlais - Tiffany Creek Elementary Principal
