

DEPT. OF FACILITIES
CONSTRUCTION REPORT
JANUARY 2018

Submitted by: Reid Reagan

NAPI SPECIAL NEEDS ROOM:

Mattingly Arms completed their project for the Special Needs room at Napi. This work consisted of constructing 2 rooms and 2 doors and taking out 1 door and adding a solid wall.

FACILITIES:

Facilities has been working with First American Title Company to get an Ownership Report for the Middle School in case we get a sale for the building. We have also hired a firm, Kembel, Kosena & Company to do an Appraisal for us for the Middle School. This we hope to receive by middle of February.

HIGH SCHOOL WINDOW TINTING:

Hired Gun Window Tinting & Design started installing the mirrored tinting film over the holidays and found the weather so cold that it affected the work so the firm will be coming back as soon as weather warms up better. They did start on the office window and left the upper part of the window without tint on it to see if the administration there liked it better all covered or a portion left uncovered. They were impressed with the latter.
