Subject: 2023-2024 & 2024-2025 District and Campus Accountability Ratings

MISD Board of Trustees: September 16, 2025

Agenda Item – 8B

Background Information

District and Campus A-F Accountability Ratings for the 2023-2024 and 2024-2025 Academic Years were released on August 15, 2025. We will present the collective data for all campuses and the district tonight. The accountability system evaluates districts and campuses across three key domains:

Domain 1: Student Achievement – measuring academic success.

Domain 2: School Progress – tracking improvement over time.

Domain 3: Closing the Gaps – focusing on equity support for specific student groups.

Each campus and the district receives a letter grade based on the combined outcome of these domains. 70% of the rating reflects the better outcome between student achievement and school progress. 30% comes from other indicators based on federally identified performance targets for specific groups of students. This design ensures that high student achievement is recognized, as well as a strong focus on students who need the most support. Tonight, we will highlight Midway's areas of excellence and areas for growth, review local school comparison data, and establish our performance targets for this school year.
